

(Theme: Integrating the Milestones in Gynec Health Globally)

## Summary

Obstetricians and Gynecologists face a wide variety of challenges: managing the care of patients of all ages from puberty through menopause and beyond; treating both acute and chronic health conditions; and of course, managing risk through the pregnancy and childbirth process.

An Obstetrician / Gynecologist (OB/GYN) earns an average salary of \$195,693 per year in USA. In 2011, obstetricians and gynecologists earned a mean income of \$220,000, somewhat less than in the previous year. About 20% of ob/gyns earned \$350,000 or more, slightly more than in last year's survey. Some 19% earned \$100,000 or less, up from about 12% the previous year. Solo practitioners earned 93% of income from clinical practice compared to 89% for group practice ob-gyns. Those in group practice derived significantly greater percentages of income from teaching/research and other professional activities.

## Importance & Scope

The United States has a higher ratio of maternal deaths than at least 40 other countries, even though it spends more money per capita for maternity care than any other. The lack of a comprehensive, confidential system of ascertainment of maternal death designed to record and analyze every maternal death continues to subject U.S. women to unnecessary risk of preventable mortality. Maternal deaths must be reviewed to make motherhood safer.

The status of maternal deaths in the United States was part of a larger report on the global, regional, and national levels and causes of maternal mortality from 1990-2013. The findings suggest that only 16 countries will achieve a target of a 75% reduction in the maternal mortality ratio (or number of maternal deaths per 100,000 live births) by 2015.

The OMICS Gynecology group has organized very successful conference on Gynecologic and Obstetrics in 2014 in Chicago, USA. And we recently approved a plan for accreditation in gynecological oncology, reproductive medicine, infertility, pelvic floor disorder, ultrasound diagnosis, Menstruation, leukoaraiosis, Body Mass Index, genitourinary medicine, and Gynecologic Cancers based on the principles of Gynecology which includes more levels, respectively. The mission of the Gynecology is to promote gynecology and obstetrics research and development in USA from both industry and academia and establish a scientific network between them.

## Why San Antonio?

San Antonio is the third largest city in the state of Texas. It is the 7th largest city in the United States of America with a population of 1.33 million. The city was named after San Antonio de Padua, whose feast day is on June 13, when a Spanish expedition stopped in the area in 1691.

Famous for Spanish missions, the Alamo, the River Walk, the Tower of the Americas, the Alamo Bowl, Marriage Island and host to SeaWorld and Six Flags Fiesta Texas theme parks, the city is visited by approximately 26 million tourists per year according to the San Antonio Convention and Visitors Bureau. The city is home to the four-time NBA champion San Antonio Spurs and the annual San Antonio Stock Show & Rodeo, one of the largest in the country. San Antonio has a strong military presence. It is home to Fort Sam Houston, Lackland Air Force Base, Randolph Air Force Base, and Brooks City-Base,

with Camp Bullis and Camp Stanley outside the city. Kelly Air Force Base was operated out of San Antonio until 2001, when the airfield was transferred over to Lakeland AFB and the remaining portions of the base became Port San Antonio, an industrial/business park. San Antonio is home to five Fortune 500 companies and the South Texas Medical Center, the only medical research and care provider in the South Texas region

The jewel of the city is the River Walk, which meanders through the downtown area. The Alamo, located nearby, is Texas' top tourist attraction, while the River Walk is the second most visited attraction. Sea World, located 16 miles (26 km) west of downtown, is the 3rd attraction. San Antonio is home to the first museum of modern art in Texas, the McNay Art Museum. Other places of interest include the San Antonio Zoo, the Japanese Tea Garden, Brackenridge Park, the missions of the San Antonio Missions National Historical Park, San Antonio Museum of Art, San Antonio Botanical Garden and the Witte Museum..

San Antonio serves as the seat of Bexar County. The city has characteristics of other western urban centers in which there are sparsely populated areas and a low density rate outside of the city limits. The city is the anchor municipality of the San Antonio-New Braunfels metropolitan area; the other principal city is its largest suburb, New Braunfels. Commonly referred to as Greater San Antonio, the metropolitan area has a population of just under 2.2 million based on the 2011 U.S. Census estimate, making it the 24th largest metropolitan area in the United States and 3rd largest in the state of Texas.

## Conference Highlights

- Midwifery
- Maternal-Fetal Medicine
- Urogynecology
- Gynecological Endocrinology
- Gynecological Oncology
- Genitourinary Medicine
- Sexual Medicine Novel approaches in genitourinary malignancies
- Reproductive Medicine
- Prenatal Diagnosis
- Family Planning
- Epidemiology in Obstetrics and Gynecology

- Menopause
- Operative Gynecology
- Infertility
- Maternal Supplements

**Why to Attend???**

As the leading event in its niche field of ultrasound in obstetrics and gynecology, we were delighted to welcome international experts from all corners of the world to present cutting edge scientific breakthroughs, offer clinical guidance and participate in lively discussions on sub-specialist areas.

Unique opportunity to discuss case studies and meet some of the most influential professionals in ultrasound for obstetrics and gynecology. The program is presented through a variety of sessions including seminal plenary lectures and didactic workshops where international experts are invited to deliver lively discussion sessions on sub-speciality topics. Cutting-edge research updates comprise more than 50% of the program and are delivered through the oral communication, short oral and poster sessions.

**A Unique Opportunity for Advertisers and Sponsors at this International event**

**Major Gynecology and Obstetrics Associations around the Globe**

- Association Gynecologists Obstetricians Tanzania AGOTA
- Association Gynecologists Obstetricians Macedonia
- Association Gynecologists Obstetricians Serbia, Montenegro Republic Srpska UGOSCGRS
- Association Obstetricians Gynecologists Malawi AOGM
- Association Obstetricians Gynecologists Uganda
- American Association of Pro Life Obstetricians and Gynecologists
- American College of Obstetricians and Gynecologists (ACOG)

**Major Gynecology and Obstetrics Associations in USA**

- American Association of Gynecologic Laparoscopists
- American Congress of Obstetricians and Gynecologists
- American Osteopathic Board of Obstetrics and Gynecology
- Southeast OB-GYN Associates, P.A.
- Lone Star OB/GYN Associates
- TEXAS ASSOCIATION OF OBSTETRICIANS AND GYNECOLOGISTS
- *American Gynecological & Obstetrical Society*

**Figure 1:** Statically analysis of associations related to obstetrics and gynecology Source: reference A

**Target Audience**

DEAN, Doctors, Research associates, Professors, assistant professors, associate professors, head of the departments, CEO of companies , related societies members, related association members and Students from Academia in the study gynecology and obstetrics filed.

**Target Audience**

- Industry 30%
- Academia 40%
- Others 30%

**Figure 2:** Target audience

**Top Universities in USA**

- Harvard University
- University of California, San Francisco
- University of Pennsylvania
- Johns Hopkins University
- University of Pittsburgh
