Dear Colleagues,

OMICS International is delighted to welcome you to Birmingham, UK for the prestigious International Conference on Anatomy & Physiology. Anatomy & Physiology-2016 will focus on “Excellence in the Teaching of Human Anatomy and Physiology”. We are confident that you will enjoy the Scientific Program of this upcoming Conference.

We look forward to see you at Birmingham, UK

With Regards,
Anatomy & Physiology-2016 Organizing Committee
OMICS International Conferences

Editorial Board Members of Supporting Journals:

Bernard Gay  
University Bordeaux Segalen, France

Wilbert S. Aronow  
New York Medical College, USA

Jun Yu  
Yale Cardiovascular Research Center, USA

Ann Dickson Hollerbach  
Medical University of South Carolina, USA

Rachael Moorin  
Curtin University, Australia

Mehran Roxana  
Division of Cardiology, Mount Sinai University, USA

Wilbert S. Aronow  
New York Medical College, USA

Jun Yu  
Yale Cardiovascular Research Center, USA

Prithwish Banerjee  
Associate Professor, University of Warwick, UK

Burton M. Altura  
Professor of Medicine, New York University, USA

Editor-in-Chief, Genetic and Biomolecular Engineering, PBMEF, San Francisco, USA

Elena Jones  
Leeds Institute of Molecular Medicine, United Kingdom

Michael Pazianas  
Institute of Musculoskeletal Science, University of Oxford, UK

Joe E. Springer  
University of Kentucky, USA

Kenneth D. Candido  
University of Illinois, USA
Venue
Birmingham, UK

Important Dates
Abstract Submission Opens: June 30, 2015
Registration Opens: June 30, 2015
Early bird Registration: September 15, 2015
On spot Registration: August 11, 2016

Accommodation
A large number of rooms have been reserved. Discounted room rates for International Conference on Anatomy & Physiology participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship
An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Anatomy & Physiology.

About Birmingham
Birmingham is a city in the West Midlands, England authority. The city is a major international commercial centre, ranked as a beta– world city by the Globalization and World Cities Research Network; and an important transport, retail, events and conference hub. Birmingham is located in the centre of the West Midlands region of England on the Birmingham Plateau – an area of relatively high ground, ranging between 500 and 1,000 feet (150–300 m) above sea level and crossed by Britain's main north–south watershed between the basins of the Rivers Severn and Trent. To the south west of the city lie the Lickey Hills, Clent Hills and Walton Hill, which reach 1,033 feet (315 m) and have extensive views over the city. Birmingham is drained only by minor rivers and brooks, primarily the River Tame and its tributaries the Cole and the Rea.

Birmingham has a temperate maritime climate, like much of the British Isles, with average maximum temperatures in summer (July) being around 21.3 °C (70.3 °F); and in winter (January) around 6.7 °C (44.1 °F). Between 1971 and 2000 the warmest day of the year on average was 28.8 °C (83.8 °F) and the coldest night typically fell to –9.0 °C (15.8 °F). Some 11.2 days each year rose to a temperature of 25.1 °C (77.2 °F) or above and 51.6 nights reported an air frost. The highest recorded temperature, set during August 1990, was 34.9 °C (94.8 °F). It is the largest and most populous British city outside Birmingham with 1,092,330 residents (2013 est.), and its population increase of 88,400 residents between the 2001 and 2011 censuses was greater than that of any other British local authority. The city lies within the West Midlands Built-up Area, the third most populous built-up area in the United Kingdom with 2,440,986 residents (2011 census), and its metropolitan area is the United Kingdom’s second most populous with 3,701,107 residents (2012 est.). Birmingham Airport, located 6 miles (9.7 km) east of the city centre in the neighbouring borough of Solihull, is the seventh busiest by passenger traffic in the United Kingdom. Airline services exist to many destinations in Europe, North America, the Caribbean, Africa, the Middle East and Asia. Birmingham New Street is the busiest railway station in the United Kingdom outside Birmingham, both for passenger entries and exits and for passenger interchanges.
