

Aquaculture & Fisheries

July 20-22, 2015 Brisbane, Australia

Theme: *“Advancing & Expanding Aquaculture Sector Focused on Developmental, Toxicological and Transgenic Scientific Research”*

Aquaculture-2015 has been awarded official recognition as contributing to the Continuing Professional Development requirements by Institute of Marine Science & Technology (IMarEST). Aimed to bring basic and advanced research of Developmental, Toxicological and Transgenic aspects, this premier event that brings together a unique and International mix of experts, researchers and decision makers both from academia and industry across the globe to exchange their knowledge, experience and research innovations to build a world aquaculture community. Aquaculture is a major field in modern food supply according to the FAO, aquaculture “is understood to mean the farming of aquatic organisms including fish, molluscs, crustaceans and aquatic plants. Farming implies some form of intervention in the rearing process to enhance production, such as regular stocking, feeding, and protection from predators, etc. For more details visit: <http://conferenceseries.com/aquaculture-fishery-aquaponics.php>

Honorable Chief Guest

Bill Byrne

Minister for Agriculture and Fisheries
Queensland, Australia

Renowned Speakers

Bosma Roel, Wageningen University, The Netherlands
Geoff Orpin, Barramundi Blue Aquaculture, Australia
Osman Samsun, Sinop University, Turkey
Niels O G Jorgensen, University of Copenhagen, Denmark
Chris Carter, University of Tasmania, Australia
Alejandro J Yanez Carcamo, Universidad Austral de Chile, Chile

Marcus Haward, University of Tasmania, Australia
Irene Dahl, University of Tromso, Norway
Clara Boglione, University of Rome Tor Vergata, Italy
Phillip Saunders, Dalhousie University, Canada
Karen N Scott, University of Canterbury, New Zealand

Scientific Tracks

- Aquatic Ecosystem and Aqua Farming Methods
- Fish Habitat Ecology and Conservation
- Comparative Biology of Aquatic Species
- Aquaculture and Biosystem Research
- Aquatic Organism's Byproducts and Their Applications
- Aquaculture Related Diseases and Health Management
- Zebra Fish: A Biological Model Organism
- Diversification in Aquaculture
- Aquatic Immunology
- Aquatic Physiology
- Ethical and Emerging Issues in Aquaculture Development
- Aquaculture Environment Interactions – Measuring, Modelling and Mitigation
- Aquaculture Law and Policy
- Aquatic Toxicology

Reminiscence of Aquaculture & Fisheries

Venue Address

Park Regis North Quay
293 N Quay,
Brisbane Queensland 4000 Australia
Tel: 61 7 3013 7200
