

International Conference on
**Astronomy, Astrophysics
and Astrobiology**

May 30-31,
2018
Osaka, Japan

Theme:
The future cannot be
predicted, but future can
be invented

Dear Colleagues,

Conference Series is delighted to welcome you to Osaka, Japan for the prestigious International Conference on Astronomy, Astrophysics and Astrobiology. Astronomy Congress 2018 will focus on the theme "The future cannot be predicted, but future can be invented". We are confident that you will enjoy the Scientific Program of this upcoming Conference.

We look forward to see you at Osaka, Japan.

With Regards,

Astronomy Congress 2018 Operating Committee

Accommodation

A large number of rooms have been reserved. Discounted room rates for Astronomy Congress 2018 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by Public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Nutrition.

About Osaka

Japan is a world apart – a cultural Galápagos where a unique civilization blossomed, and today thrives in contrasts of traditional and modern. The Japanese spirit is strong, warm and incredibly welcoming. Japan is a leading nation in scientific research, particularly technology, machinery and biomedical research. Japan leads the world in robotics production and use.

Osaka is the second largest metropolitan area in Japan and serves a major economic hub. Historically a merchant city, Osaka has also been known as the “Nation’s Kitchen”. With a population of 2.5 million, Osaka is Japan’s third largest and second most important city. It has been the economic powerhouse of the Kansai region for many centuries.

The city’s west side has the main port as well as a tourist destination with attractions such as Kyocera Dome, Universal Studios Japan, Osaka aquarium, Minami, Osaka castle, Umeda sky building and the Tempozan Harbour Village. Osaka is known for its food, both in Japan and abroad. Author Michael Booth and food critic François Simon of Le Figaro have both suggested that Osaka is the food capital of the world. Osaka’s culinary prevalence is the result of a location that has provided access to high quality ingredients, a high population of merchants, and close proximity to the ocean and waterway trade. In recent years, Osaka has started to garner more attention from foreigners with the increased popularity of cooking and dining in popular culture.

The National Museum of Art (NMAO) is a subterranean Japanese and international art museum, housing mainly collections from the post-war era and regularly welcoming temporary exhibitions.

Important Dates

Abstract Submission Opens: July 15, 2017

Registration Opens: July 30, 2017

Early bird Registration: Open

On spot Registration: May 30, 2018

Venue

Osaka, Japan

Abstract Submission
