# Program Announcement

## **Accommodation**

*A large number of rooms have been reserved. Discounted room rates for Biostatistics 2017 participants are proposed. Only reservations made through the Conference will benefit these rates. The Conference Center can be easily reached by Public transportation.*

## **Exhibition and Sponsorship**

*An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the field of Biostatistics and Bioinformatics.*

## **About Atlanta**

*Atlanta is the capital of and the most populous city in the U.S. state of Georgia, with an estimated 2015 population of 463,878. Atlanta is the cultural and economic centre of the Atlanta metropolitan area, home to 5,522,942 people and the ninth largest metropolitan area in the United States. Atlanta is the county seat of Fulton County, and a small portion of the city extends eastward into DeKalb County.*

*Atlanta was established in 1837 at the intersection of two railroad lines, and the city rose from the ashes of the American Civil War to become a national centre of commerce. In the decades following the Civil Rights Movement, during which the city earned a reputation as “too busy to hate” for the relatively progressive views of some of its citizens and leaders compared to other cities in the Deep South Atlanta attained international prominence. Atlanta is the primary transportation hub of the Southeastern United States, via highway, railroad, and air, with Hartsfield–Jackson Atlanta International Airport being the world’s busiest airport since 1998.*

*Atlanta is an “alpha-” or “world city”, exerting a significant impact upon commerce, finance, research, technology, education, media, art, and entertainment. It ranks 36th among world cities and 8th in the nation with a gross domestic product of \$270 billion. Atlanta’s economy is considered diverse, with dominant sectors including logistics, professional and business services, media operations, and information technology. Topographically, Atlanta is marked by rolling hills and dense tree coverage. Revitalization of Atlanta’s neighborhoods, initially spurred by the 1996 Olympics in Atlanta, has intensified in the 21st century, altering the city’s demographics, politics, and culture.*
