An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the field of Pharmacy.

About Chicago

Chicago is the third most populous city in the United States. With more than 2.7 million inhabitants it is the most populated city in the state of Illinois and the States. Chicago, often referred to as Chicago land, has about 10 million individuals and is the third-largest in the U.S. It has the third largest gross metropolitan product in the United States about \$630.3 billion as per 2014-2016- estimates. Chicago is well known for having the adjusted economy in the United States.

Chicago is a considered as an international hub for technology, telecommunications, food and transportation. Illinoisans are progressively feeling the impacts of diabetes as a large number of individuals experience the ill effects of the disorder, and numerous others may have diabetes and not know it. More than 29 million Americans have diabetes and rest of the 86 million people have prediabetes. CDC extends that one-in-three grown-ups could have diabetes by 2050. More than one-fourth of seniors (aged 65 and more) have diabetes (25.9 percent or 11 million seniors). Diabetes is the seventh driving purpose behind death in the United States, representing around \$245 billion in restorative expenses and lost efficiency every year. It is assessed that one out of each three youngsters conceived after 2000 in the United States will be straightforwardly influenced by diabetes. There is rise in the number of deaths due to nutrition-related diseases in Chicago. Prime advancements in diabetic nutrition research are found in Chicago. There is also increase in the compound annual growth rate of diabetic diet food and nutritional supplements.
