# Program Announcement

## Venue

Hyatt Place Amsterdam Airport,  
Rijnlanderweg 800 Hoofddorp,  
Amsterdam, Netherlands  
2132 NN

## Important Dates

Early bird Registration: September 30, 2016  
On spot Registration: March 02, 2017

## Accommodation

A large number of rooms have been reserved. Discounted room rates for Euro Food 2017 participants are proposed. Only reservations made through the Conference will benefit these rates. The Conference Center can be easily reached by public transportation.

## Exhibition and Sponsorship

An Exhibition will be held concurrently with the conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Euro Food 2017.

## About Amsterdam

Amsterdam is located in the western Netherlands, in the province of North Holland. The river Amstel terminates in the city centre and connects to a large number of canals that eventually terminate in the IJ. Amsterdam is situated 2 metres below sea level. The surrounding land is flat as it is formed of large polders. A man made forest, Amsterdamse Bos, is situated southwest. Amsterdam is connected to the North Sea through the long North Sea Canal.

Amsterdam has an oceanic climate (Köppen climate classification Cfb), strongly influenced by its proximity to the North Sea to the west, with prevailing westerly winds. Both winters and summers are considered mild, although occasionally quite cool. Amsterdam, as well as most of the North Holland province, lies in USDA Hardiness zone 8b.

Amsterdam is intensely urbanized, as is the Amsterdam metropolitan area surrounding the city. Comprising 219.4 square kilometres (84.7 square miles) of land, the city proper has 4,457 inhabitants per km<sup>2</sup> and 2,275 houses per km<sup>2</sup>. Parks and nature reserves make up 12% of Amsterdam's land area.

**Canals:** Amsterdam is home to more than one hundred kilometers of canals. The three main canals are Prinsengracht, Herengracht and Keizersgracht, all 3 of which are navigable by boat. In the Middle Ages, Amsterdam was surrounded by a moat, called the Singel, which now forms the innermost ring in the city, and makes the city center a horseshoe shape. The city is also served by a seaport. It has been compared with Venice, due to its division into approximately 90 islands, which are linked by more than 1,200 bridges.
