

International Conference on Genetic Counseling and Genomic Medicine

Madrid, Spain December 07-08, 2016

Dear Colleagues,

OMICS International is delighted to welcome you to Madrid, Spain for the prestigious **International Conference on Genetic Counselling and Genomic Medicine**. Genomic Medicine 2016 will focus on "**Novel research on Genetic Counselling and Genomic medicine for Global Health**". We are confident that you will enjoy the Scientific Program of this upcoming Conference.

We look forward to see you at Madrid, Spain.

With Regards,
Genomic Medicine 2016 Operating Committee
OMICS International Conferences

Editorial Board Members of Supporting Journals

Marcelo Bento Soares
Northwestern University, USA

Wei Hsu
University of Rochester, USA

Austin J Cooney
Baylor College of Medicine, USA

Cassandra Smith
Boston University, USA

Simon Daefler
Mount Sinai School of Medicine, USA

Jiaxu Li
Mississippi State University, USA

David (Da Wei) Huang
National Institutes of Health, USA

Rais Ansari
Nova Southeastern University, USA

Henry T Nguyn
University of Missouri, USA

Alan J Tacket
University of Arkansas for Medical Sciences, USA

Peter Nilsson
KTH - Royal Institute of Technology, Sweden

Sandra Orchard
Wellcome Trust Genome Campus, UK

Wen G. Jiang
Cardiff University, UK

Paul J. Higgins
Albany Medical College, USA

Masayoshi Yamaguchi
Emory University, USA

Venue

Madrid, Spain

Important Dates

Abstract submission opens: August 24, 2016

Registration opens: August 24, 2016

Early bird registration: September 24, 2016

On spot registration: December 07, 2016

Accommodation

A large number of rooms have been reserved. Discounted room rates for Genomic Medicine 2016 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Genetic Counselling and Genomic Medicine and Infectious Diseases.

About Madrid

Madrid is a city and metropolitan borough in Greater Madrid, England, with a population of 514,417 as of 2013. It lies within the United Kingdom's second-most populous urban area, with a population of 2.55 million. Madrid is fringed by the Cheshire Plain to the south, the Pennines to the north and east and an arc of towns with which it forms a continuous conurbation. The local authority is Madrid City Council.

In 2014 the Globalization and World Cities Research Network ranked Madrid as a beta world city and consequently as the highest-ranked British city apart from London. Its metropolitan economy is the second biggest in England according to the ONS. Madrid is the third-most visited city in the UK by foreign visitors, after London and Edinburgh. It is notable for its architecture, culture, musical exports, media links, scientific and engineering output, social impact, sports clubs and transport connections. Madrid Liverpool Road railway station was the world's first inter-city passenger railway station and in the city scientists first split the atom and developed the stored-program computer.

The night-time economy of Madrid has expanded significantly since about 1993, with investment from breweries in bars, public houses and clubs, along with active support from the local authorities. The more than 500 licensed premises in the city centre have a capacity to deal with more than 250,000 visitors, with 110–130,000 people visiting on a typical weekend night. The night-time economy has a value of about £100 million and supports 12,000 jobs.

Madrid is well known for being a city of sport. The city has two Premier League football clubs – Madrid United and Madrid City. Madrid United play at Old Trafford, in the neighbouring Greater Madrid borough of Trafford, the largest club football ground in the United Kingdom.
