Program Announcement

Venue

Rome, Italy

Important Dates

Abstract Submission opens: July 25, 2016

Registration opens: July 23, 2016

Early bird registration: August 29, 2016

On spot registration: March 22, 2017

Accommodation

A large number of rooms have been reserved. Discounted room rates for Diabetes Global 2017 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Diabetes@ Diabetes Global 2017.

About Rome

Rome, Caput Mundi during the Roman Empire, capital of Italy since 1870, home of the Catholic Church and the Italian government, is placed on the banks of the Tiber, there where the river, running weakly among the seven hills, creates vast meanders which originate little plains. Rome, the “eternal city”, is so called because it is a place of great beauty, contrast and life. Rome is an eclectic city: the religious world centre of Catholic Church, the fabulous ruins of the centre of the Roman Empire, and modern, bustling Rome. With its 2,459,776 inhabitants (2001), Rome is today the biggest and most populous city of Italy. Located in the middle of the Italian peninsula, the city is easily accessible from most important places both in Italy and abroad. A network of motorways approaches Rome, including the A1 from northern Italy (Milan, Florence), this joins the busy Rome ring-road (Grande accordo Anulare) at settebagni, from which there are well sign-posted exits to all districts of the city. The city is well served by two underground railway system besides the fairly efficient bus and tram services. The climate is temperate, with breezy winters and hot summers.

Italy is bound to the north by Switzerland and Austria, to the east by Slovenia and the Adriatic Sea, to the south by the Mediterranean, Tyrrhenian, and Ligurian seas, and to the west by France. It covers 301,308 square kilometers (116,335 square miles), and Rome is located about halfway down Italy’s western coast. The population of the city of Rome is around 2.7 million. The entire metropolitan area of Rome has an estimated 3.7 million people. By the early fourth century, the Romans had built a road network of 53,000 miles throughout the empire. Each Roman mile was about 1,000 paces (about 4,800 feet) and was marked by a milestone. Hence the proverb “All roads lead to Rome.” The word “palace” comes from the Palatine Hill, where Augustus established the emperors’ tradition of building their palaces.
