Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Biotechnology.

About Delhi

New Delhi is the capital territory of India. Delhi's culture has been influenced by its lengthy history and historic association as the capital of India. It is the third largest city of the world. It is also the second largest metropolis after Mumbai with a population of over 13 million. Delhi is also one of the oldest continually inhabited cities of India. Delhi stands in a triangle formed by the Yamuna river in the east and spurs from the Aravalli range in the west and south. This city is believed to be the site of Indraprastha, legendary capital of the Pandavas in the Indian epic, the Mahabharata.

In the early 13th century the city passed into the hands of five successive Turkish and Afghans dynasties of Delhi. They built a sequence of forts and townships that are parts of the seven cities of Delhi. By British in 1911 Delhi was again made the capital of India. After Independence on 15th August 1947, Delhi was officially declared as the Capital of republic.

Each year Delhi draw a huge number of tourists. Some of the worth visiting places are - India Gate, Rashtrapati Bhavan, Red Fort, Qutub Minar, Humayun's tomb, Jama Masjid, Jantar Mantra, Laxmi Narayan Mandir, Birla Mandir, Lotus Temple etc.

As India's National capital and centuries old mughal capital, Delhi influenced the food habits of its residents and is where Mughlai cuisine originated. Along with Indian cuisine, a variety of international cuisines are popular among the residents. The dearth of food habits among the city's residents created a unique style of cooking which became popular throughout the world. Delhi has been continuously inhabited since the 6th century BC. The principal food crops of Delhi are wheat, bajra, jowar, gram and maize, however emphasis has now shifted from food crops to vegetable and fruit crops, dairy and poultry farming, floriculture etc. These are more remunerative than food crops in the territory. Delhi is a cluster of a number of cities spread across the metropolitan region, the location of the current city sits a limestone ridge.

Being the national capital New Delhi shows elevated advancement in the Research, Industrial and Infra structural development, out of which Food & Beverage Industry ranked fifth in terms of its production, consumption & export. The key industries are IT, Telecom, Media etc.. On other hand it has various research universities like JNU, IIT Delhi, All India Institute of Medical Sciences (AIIMS), IARI (Indian Agricultural Research Institute), University of Delhi etc.. APEDA (Agricultural and Processed Food Products Export Development authority), FCI (Food Corporation of India) Head Quarters are located in there. Delhi is said to heart of various research, Pharmaceutical, Food & Beverage industries

There are a number of places, where one can relax and just absorb that tropical feel and soak in the warm rays of the sun. After a long tiring day, you can rest at numerous hotels, inns, and chalets. There are luxurious boutique hotels that you will truly enjoy.
