About Dubai

Dubai is the most populous city in the United Arab Emirates (UAE). It is located on the southeast coast of the Persian Gulf and is one of the seven emirates that make up the country. The city of Dubai is located on the emirate's northern coastline and heads up the Dubai-Sharjah-Ajman metropolitan area.

Dubai has emerged as a global city and business hub of the Middle East. It is also a major transport hub for passengers and cargo. By the 1960s, Dubai's economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai's oil revenue helped accelerate the early development of the city, but its reserves are limited and production levels are low: today, less than 5% of the emirate's revenue comes from oil. The emirate's Western-style model of business drives its economy with the main revenues now coming from tourism, aviation, real estate, and financial services. Dubai has recently attracted world attention through many innovative large construction projects and sports events. The city has become iconic for its skyscrapers and high-rise buildings, in particular the world's tallest building, the BurjKhalifa.

Dubai delivers a world class education and also immense job opportunities for well-educated students. The most well-known medical universities in Dubai are Gulf Medical University, RAK Medical and Health Sciences University, Royal College of Surgeons in Ireland (Dubai), Harvard Medical School Dubai Center, Dubai Medical College offering courses in Toxicology, Pharmacology, Public Health, Clinical Pathology, Community Medicine, Pathology, Histology, Biochemistry, Surgery.
