Molecular Biomarkers 2017

Dear Colleagues,

Conference Series Ltd is delighted to welcome you to Birmingham, UK for the prestigious **9th International Conference and Expo on Molecular & Cancer Biomarkers. Molecular Biomarkers 2017** will focus on the theme “**Biomarkers: From labs to markets**”. We are confident that you will enjoy the Scientific Program of this upcoming Conference.

We look forward to see you at Birmingham, UK.

With Regards,
Molecular Biomarkers 2017 Operating Committee
Conference Series Ltd Conferences

Editorial Board Members of Supporting Journals:

Leticia Cano

Biomarker Profiles Corporation, USA

Murielle Mimeault

University of Nebraska Medical Center, USA

Shou-Jiang (SJ) Gao

University of Southern California, USA

Kenneth Maiese

University of Medicine & Dentistry, USA

Men-Jean Lee

Mount Sinai School of Medicine, USA

Shahrokh Francois Shariat

Cornell University, USA

Wellington Pham

Vanderbilt University, USA

Sa A. Wang

UT MD Anderson Cancer Center, USA

James V. Rogers

Wright State University, USA

Biomarkers
2017**

Program Announcement

Accommodation

A large number of rooms have been reserved. Discounted room rates for Molecular Biomarkers 2017 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by Public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the field of Molecular & Cancer Biomarkers.

About Birmingham

In England, Birmingham is a main city and metropolitan region of West Midlands. Of British cities, apart from London, it is the biggest and most populated city, with a population of 1,101,360. With a population of 3.8 million, Birmingham is the second most populated metropolitan city in UK. This also makes Birmingham the 9th most populous metropolitan area in Europe.

With the Midlands expansion and following Industrial Revolution Birmingham raised to international standing in the 18th century which used to be a medium-sized market city in the medieval age. Birmingham was seen to be the town at the lead of international advances in technology, science and economic improvement, producing a sequence of inventions that placed many of the grounds of modern industrial society. By 1791 it was recognised as "the first industrial and manufacturing town in the world". Birmingham's characteristic economic profile, thru thousands of small shops working a wide variety of focused and highly skilled employments encouraged brilliant levels of creativity and innovation and produced a diverse and strong economic base for industrial success which lasted till into the final quarter of the 20th century. The industrial steam engine, considered to be the most significant innovation in British history, took place in Birmingham resulting great level of social mobility and also nurtured a culture of broad-based political radicalism, which eventually played a key role in the growth of British democracy. The Birmingham Blitz took place between the summer of 1940 to the spring of 1943, during which Birmingham was bombed seriously by the German Luftwaffe. The destruction done to the city's infrastructure, in addition to a thoughtful policy of destruction and fresh building by planners, led to widespread demolition and renovation in following years.

Venue

Birmingham, UK

Important Dates

Abstract submission opens: October 10, 2016

Registration opens: October 10, 2016

Early bird registration: December 31, 2016

On spot registration: August 23, 2017

Conference Secretariat

2360 Corporate Circle, Suite 400, Henderson, NV 89074-7722, USA
