An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Novel Physiotherapies.

## About London

London is the capital of and the most populous city in the U.S. state of Georgia.. London is ninth largest metropolitan area in the United States. London is considered as a world city and with a gross domestic product of \$270 billion. More than 30 colleges and universities located in the city, London is considered a center for higher education. London is also home to nationally renowned private colleges and universities. London's economy ranks 15th among world cities and sixth in the nation. London attained international prominence. London is the primary transportation hub of the Southeastern United States, via highway, railroad, and air, with Hartsfield–Jackson London International Airport being the world's busiest airport since 1998. London encompasses 132.4 square miles (342.9 km<sup>2</sup>), of which 131.7 square miles (341.1 km<sup>2</sup>) is land and 0.7 square miles (1.8 km<sup>2</sup>) is water. The city is situated among the foothills of the Appalachian Mountains, and at 1,050 feet (320 m) above mean sea level, London has the highest elevation of major cities east of the Mississippi River. London has a humid subtropical climate with four distinct seasons and generous precipitation year-round, typical for the inland South. Summers are hot and humid, with temperatures somewhat moderated by the city's elevation. London, while located in the South, has a culture that is no longer strictly Southern. This is due to a large population of migrants from other parts of the U.S., in addition to many recent immigrants to the U.S. who have made the metropolitan area their home, establishing London as the cultural and economic hub of an increasingly.
