Program Announcement

Venue
Dubai, UAE

Important Dates
Abstract submission opens: July 22, 2015
Registration opens: July 23, 2015
Early bird registration: December 13, 2015
Last date registration: March 14, 2016
On spot registration: April 25, 2016

Accommodation
A large number of rooms have been reserved. Discounted room rates for Pollution Control 2016 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship
An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Pollution Control.

About Dubai
Dubai has emerged as a global city and business hub of the Middle East. Dubai has recently attracted world attention through many innovative large construction projects and sports events. The city has become symbolic for its skyscrapers and high-rise buildings, in particular the world’s tallest building, the Burj Khalifa. Dubai was rated as one of the best places to live in the Middle East by American global consulting firm Mercer.

Tourism is an important part of the Dubai government’s strategy to maintain the flow of foreign cash into the emirate. Dubai’s lure for tourists is based mainly on shopping, but also on its possession of other ancient and modern attractions. The emirate is also the most populous of the seven emirates of the United Arab Emirates. Dubai has been called the “shopping capital of the Middle East”. Dubai alone has more than 70 shopping centers, including the world’s largest shopping center, Dubai Mall. Dubai is also known for the traditional souk districts located on either side of its creek. The Dubai Miracle Garden, a 72,000-square meter flower garden, opened in Dubai land. It is currently the world’s largest flower garden. It has 45 million flowers with re-use of waste water through drip irrigation.

Dubai has a rich collection of buildings and structures of various architectural styles. Many modern interpretations of Islamic architecture can be found here, due to a boom in construction and architectural innovation in the Arab World in general, and in Dubai in particular, supported not only by top Arab or international architectural and engineering design firms such as Al Hashemi and Aedas, but also by top firms of New York and Chicago.
