University of Bonn  
Germany.

**Maciej Baglaj**  
Wroclaw University of Medicine  
Wroclaw, Poland

**Anthony Martin Gerdes**  
New York College of Osteopathic  
Medicine  
USA

**EmadKandil**  
Tulane University  
USA

**Masayoshi Yamaguchi**

Emory University School of  
Medicine, USA

**Barry Elliot Hurwitz**  
University of Miami  
USA

**Ilene Fennoy**  
Columbia University Medical  
Center  
USA

**Jimmy Thomas Efirid**  
East Carolina University  
USA

**Sudhakar Akul Yakkanti**  
Stanford Research Institute (SRI)

International  
USA

**Alexandros Makriyannis**  
Northeastern University  
USA

**Victor Chaban**  
Los Angeles  
USA

**VanjaVucicevic Boras**  
University of Zagreb  
Croatia

**Al Moustafa Ala-Eddin**  
McGill University  
Canada

# Program Announcement

## Venue

Taiwan, Taipei

## Important Dates

Abstract Submission open: September 26, 2016

Online registration open: September 27, 2016

Early bird registration: November 21, 2016

On spot Registration: June 12, 2017

## Accommodation

A large number of rooms have been reserved. Discounted room rates for Thyroid 2017 participants are proposed. Only reservations made through the Conference will benefit these rates. The Conference Center can be easily reached by public transportation.

## Exhibition and Sponsorship

An Exhibition will be held concurrently with the conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Thyroid 2017.

## About Taiwan

Taiwan, officially the Republic of China (ROC), is a state in East Asia. Neighbors include the People's Republic of China (PRC) to the west, Japan to the northeast, and the Philippines to the south. Taiwan is the most populous non-UN state and the largest economy outside the UN. The island of Taiwan was mainly inhabited by Taiwanese aborigines before Han Chinese began immigrating to the island in the 17th century. European settlements and the Kingdom of Tungning were established shortly before China annexed the island. Taiwan maintains a stable industrial economy as a result of rapid economic growth and industrialization, which has been dubbed the Taiwan Miracle. Taiwan is one of the Four Asian Tigers and a member of the World Trade Organization and Asia-Pacific Economic Cooperation. The 21st-largest economy in the world, its high-tech industry plays a key role in the global economy. Taiwan is ranked highly in terms of freedom of the press, health care, public education, economic freedom, and human development.

The island of Taiwan lies some 180 kilometers (110 mi) off the southeastern coast of mainland China, which lies across the Taiwan Strait, and has an area of 35,883 km<sup>2</sup> (13,855 sq. mi). The East China Sea lies to the north, the Philippine Sea to the east, the Bashi Channel of the Luzon Strait directly to the south, and the South China Sea to the southwest. All are arms of the Pacific Ocean. The shape of the main island of Taiwan is similar to a sweet potato or tobacco leaf seen in a south-to-north direction, and therefore, Taiwanese (especially Min Nan speakers) often call themselves "children of the Sweet Potato. Taiwan's highest point is Yu Shan (Jade Mountain) at 3,952 meters (12,966 ft.); Taiwan is the world's fourth-highest island.

Taiwan lies on the Tropic of Cancer, and its general climate is marine tropical. The northern and central regions are subtropical, whereas the south is tropical and the mountainous regions are temperate. The average rainfall is 2,600 mm per year for the island proper; the rainy season is concurrent with the onset of the summer East Asian Monsoon in May and June. The entire island experiences hot, humid weather from June through September. Typhoons are most common in July, August and September. During the winter (November to March), the northeast experiences steady rain, while the central and southern parts of the island are mostly sunny.

## Conference Secretariat
