

Initial Announcement

Annual Meeting on **Viral Outbreaks and Epidemiology**

Baltimore, USA October 16-18, 2017

Dear Colleagues,

Conference Series LLC is delighted to welcome you to Baltimore, USA for the Prestigious Annual Meeting on Viral Outbreaks and Epidemiology. Viral Outbreaks 2017 will focus on "*Viral Outbreaks and Epidemiology in a Global Perspective*". We are confident that you will enjoy the Scientific Program of this upcoming Conference.

We look forward to see you at Baltimore, USA.

With Regards,
Viral Outbreaks 2017 Organizing Committee
Conference Series LLC Conferences

Editorial Board Members of Supporting Journals:

Jay C. Brown, PhD

University of Virginia Cancer Center, USA

Severin O. Gudima, PhD

Microbiology, Molecular Genetics and Immunology
University of Kansas, USA

Li Wu, PhD

Department of Global Health
Ohio State University, USA

Abdul A Waheed, PhD

Virus-Cell Interaction Section
National Cancer Institute, USA

Nejat Düzgüneş, PhD

Department of Biomedical Sciences
University of the Pacific, USA

Slobodan Paessler, PhD

Department of Pathology
University of Texas Medical Branch, USA

Jared D. Evans, PhD

Molecular Microbiology and Genetics
University of Pittsburgh, USA

Luis Martinez-Sobrido, PhD

Department of Microbiology and Immunology
University of Rochester Medical Center, USA

Maria Antonieta Guerrero-Plata, PhD

Department of Pathobiological Sciences
Louisiana State University, USA

Jennifer Webster-Cyriaque, PhD

Department of Microbiology and Immunology
University of North Carolina, USA

Program Announcement

Venue

Baltimore, USA

Important Dates

Abstract submission opens: July 17, 2016

Registration opens: August 07, 2016

Early bird registration: September 21, 2016

On spot registration: October 16, 2017

Accommodation

A large number of rooms have been reserved. Discounted room rates for Viral Outbreaks 2017 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Viral Outbreaks and Epidemiology.

About Baltimore

Baltimore, the largest city in Maryland, is situated in the northern part of the state on the Patapsco River estuary, an arm of Chesapeake Bay. The city is independent and does not fall within any county.

The site was settled in the early 17th century and founded as a town in 1729. The town was named after Lord Baltimore, the founder of Maryland, and was incorporated as a city in 1797. It has an excellent harbor and has been a principal port since the 18th century. Baltimore was a pioneer shipbuilding center, and the Baltimore clipper was used extensively in world trade.

The city has been greatly affected by the nation's wars. During the War of 1812, the British bombarded nearby Fort McHenry, inspiring Francis Scott Key to write the Star-Spangled Banner. And although Maryland never seceded from the Union, Baltimore was occupied by Union troops throughout the Civil War. The city was also an important shipbuilding and supply center during the World Wars.

Baltimore's economy is very diverse, with strong financial, legal, and nonprofit service industries. The city also leads in scientific research and development through two highly acclaimed medical institutions, Johns Hopkins Hospital and University of Maryland Hospital. There is also a significant tourist sector. Major attractions include the the National Aquarium, Harborplace, the Maryland Science Center, the Babe Ruth Museum, Fort McHenry National Monument, and Pimlico Race Course, site of the Preakness.
