

November 03-05, 2014 Embassy Suites Las Vegas, USA

Tentative Program

	remative Frogram
	Day 1 November 03, 2014
08:30-09:30	Registrations
09:30-09:55	Opening Ceremony
	Keynote Forum
	Introduction
	Charles W Heilig,
09:55-10:20	Editor-in-Chief for Journal of Diabetes & Metabolism, University of Florida, USA
	Zhengyuan Xia,
10:20-10:45	Executive Editor for Journal of Diabetes & Metabolism, University of Hong
	Kong, China
	Coffee Break 10:45-11:05
11:05-11:30	Ippei Kanazawa, Shimane University, Japan
11:30:11:55	Anil K Mandal, University of Florida, USA
	cal Diabetes and Diagnostic Approaches
	crinology: Patient-Oriented Case Management Discussions
	nced Technologies for Treatment of Diabetes
Chair	
Co-Chair	
_	Title: Increased absolute systolic ankle pressures and reduced estimated
11:55-12:15	glomerular filtration rate
	Kirti Kain , University of leeds, UK
	Title: Comprehensive biomarker testing of glycemia, insulin resistance and
12:15-12:35	beta cell function is associated with improved glycemic control in clinical practice
	Stephen Varvel, Health Diagnostic Laboratory, USA
	Title: Opportunistic screening on admission to hospital: A missed
12:35-12:55	Title: Opportunistic screening on admission to hospital: A missed opportunity to detect early
12:35-12:55	
12:35-12:55	opportunity to detect early
12:35-12:55 12:55-13:15	opportunity to detect early Ranjna Garg, Barnet Hospital NHS Trust, UK

13:15-13:35	Title: Antioxidants status of stz-induced diabetic rats treated with extract of momordica charantia Omobola Komolafe, Awolowo University, Nigeria
	Lunch Break 13:35-14:35
14:35-14:55	Title: Randomized controlled trial of lifestyle intervention for type 2 diabetes patients in Kuwait and its impact on glycaemic control and the quality of life Mai Alhazzaa, University of Reading, UK
14:55-15:15	Title: Fuel metabolism in diabetic pregnancy Firdous memon, Public University LUMHS, Pakistan
15:15-15:35	Title: Of pregnant women and mice: Maternal-fetal disposition of glyburide during pregnancy and implications for the treatment of gestational diabetes mellitus
15:35-15:55	Qingcheng Mao, University of Washington, USA Title: Impact of mobile phone short text messages on glycemic control in type 2 diabetes
	Bassam Bin Abbas, King Faisal Specialist Hospital, Saudi Arabia
15:55-16:15	Title: Hepcidin mediates estrogen-dependent changes in serum iron availability in humans
	Mawieh Hamad, University of Sharjah, UAE
46.45.46.25	Title: Chronic effects of fatty acids on insulin secretion and metabolic
16:15-16:35	profile in mouse and human pancreatic islets Nicolai Doliba, University of Pennsylvania, USA
	Coffee Break 16:35-16:55
	Title: Effect of Bauhinia variegata: A phytomedicine in type I Diabetic rats
16:55-17:15	Yogesh A Kulkarni, SPP School of Pharmacy & Technology Management, India
17:15-17:35	Title: Assessment of the probable causes of affective disturbances in diabetes mellitus-II
	Mohd Fazil, Ministry of Health and Family Welfare, India
17:35-17:55	Title: Insulin delivery using solid micro needle patches in diabetic rats Felner Eric Ian, Emory University School of Medicine, USA
17:55-18:15	Title: Dietary fiber psyllium based hydrogels for use in insulin delivery Nirmala Chauhan, Govt Degree College, India
18:15-18:35	Title: Laser therapy speeds up healing of chronic diabetic ulcers Nicolette N Houreld, University of Johannesburg, South Africa
18:35-18:55	Title: 1-deoxynojirimycin inhibits glucose absorption and accelerates glucose metabolism in streptozotocin-induced diabetic mice You Gui Li, Zhejiang Academy of Agricultural Science, China

Title: Antioxidant N-acetylcysteine improves cardiac diastolic function in diabetic rats by attenuating PKC\u03b32activation and improving caveolae 18:55-19:15 function and eNOSsignaling Zhong-yuan Xia, Wuhan University, China Panel Discussion 19:15-19:20 Cocktail Sponsored by: Journal of Diabetes & Metabolism Day 2 November 04, 2014 **Keynote Forum** 09:00-09:20 Khaled Alswat, Taif University, Saudi Arabia Premanidhi Panda, Dr. Panda Diabetes Institute. India 09:20-09:40 **Track 2: Diabetes Management Session Introduction** Chair Co-Chair Title: Culturally sensitive patient-centered educational program for self management of type 2 diabetes: A randomized controlled trial 09:40-10:00 Badriya Abdulla Al-Lenjawi, Weil Cornell medical college, Qatar Title: Diabetic foot salvage by Limited Access Dressing 10:00-10:20 Pramod kumar, King Abdul Aziz hospital, Saudi arabia Title: Tools for decision making in diabetic foot ulcers 10:20-10:40 Michael Strauss, Long Beach Memorial Medical Center, USA Title: Update on diabetes management: Learn the update on glucose 10:40-11:00 lowering agents Sheikh Ali Mae, University of Florida College of Medicine, USA Coffee Break 11:00-11:20 Title: Insulin pump therapy in children and adolescents: Educational program in Bogota Colombia 11:20-11:40 Camila Cespedes, Pontificia Universidad Javeriana, Colombia Title: Barriers to the effective management of diabetic foot in the middle 11:40-12:00 Abdul Hakeem Hamza, Primary Health Care Corporation, Qatar Title: Anti diabetic activity of Indian plants with their phytoconstituents 12:00-12:20 Shashi Alok, Bundelkhand University, India Title: Nutritional and genotoxic stress contributes to diabetes and neurodegenerative diseases such as Parkinson's and Alzheimer's diseases 12:20-12:40 Ian Martins, Edith Cowan University, Australia Title: Objective evidence that nerve decompression protects against foot ulceration and reulceration in diabetic polyneuropathy 12:40-13:00 Scott Nickerson, Sheridan Memorial Hospital, USA

Lunc	h Brea	k 13:0	0-14:00

	Lunch Break 13:00-14:00
	Title: Prevention of type 2 diabetes in urban American Indian/Alaska
	natives communities: The Life in balance Pilot Study
14:00-14:20	Carolee Dodge Francis, University of Nevada, USA
14.00 14.20	Title: Antidiabetic and antinociceptive potential of selected eastern-
14:20-14:40	Mediterranean medicinal plants
	Karim M Raafat, Beirut Arab University, Lebanon
	Title: Hypoglycemic activity and regeneration of pancreatic beta-cells
14:40-15:00	produced by allium cepa in alloxan-induced diabetic rats
	Imad Taj Eldin, University of Gezira, Sudan
	Title: Diabetes management in Nigeria and the risk of herb-drug
15:00-15:20	interactions
	Udoamaka Ezuruike, UCL School of Pharmacy, London
45-20 45-40	Title: Early alterations in renal intercellular junctions in diabetes
15:20-15:40	Jose Luis Reyes, National Polytechnic Institute, Mexico
	Coffee Break 15:40-16:00
	Title: Hypoglycemia in diabetes mellitus: Correlation with HBA1C and
16:00-16:20	overall glycemic control
	Anupam Kotwal, University of Massachusetts Medical School, USA
	Panel Discussion 16:20-16:40
	Break Out-2
	Break Out-2 Session Introduction
Track 3: Diabo	= 1 0 0 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Track 3: Diabo	Session Introduction
	Session Introduction etes and its Complications
Chair	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic
Chair	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new
Chair Co-Chair	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound?
Chair Co-Chair	Session Introduction Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom
Chair Co-Chair 09:40-10:00	Session Introduction Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced
Chair Co-Chair	Session Introduction Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells
Chair Co-Chair 09:40-10:00	Session Introduction Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced
Chair Co-Chair 09:40-10:00	Session Introduction Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China
Chair Co-Chair 09:40-10:00	Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China Title: Comparative studies between amyl nitrite and butyl nitrite in nitrite
Chair Co-Chair 09:40-10:00 10:00-10:20	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China Title: Comparative studies between amyl nitrite and butyl nitrite in nitrite induced hemoglobin oxidation of diabetics and non diabetics blood
Chair Co-Chair 09:40-10:00 10:00-10:20	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China Title: Comparative studies between amyl nitrite and butyl nitrite in nitrite induced hemoglobin oxidation of diabetics and non diabetics blood John Philip Tarburton, National University, USA
Chair Co-Chair 09:40-10:00 10:00-10:20	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China Title: Comparative studies between amyl nitrite and butyl nitrite in nitrite induced hemoglobin oxidation of diabetics and non diabetics blood John Philip Tarburton, National University, USA Title: Can increased lycopene consumption reduce cardiovascular risk in
Chair Co-Chair 09:40-10:00 10:00-10:20	Session Introduction Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China Title: Comparative studies between amyl nitrite and butyl nitrite in nitrite induced hemoglobin oxidation of diabetics and non diabetics blood John Philip Tarburton, National University, USA Title: Can increased lycopene consumption reduce cardiovascular risk in diabetic patients
Chair Co-Chair 09:40-10:00 10:00-10:20	Session Introduction etes and its Complications Title: Impact of the nocebo effect in clinical studies of painful Diabetic Peripheral Neuropathy. Can this effect masquerade a safety signal of a new investigational compound? Domenico Merante, Daiichi Sankyo Development Ltd, United Kingdom Title: Selective inhibition of PKC-β2 attenuates nitroglycerine-induced tolerance and prevents TNF-α induced toxicity in endothelial cells Shaoqing Lei, Wuhan University, China Title: Comparative studies between amyl nitrite and butyl nitrite in nitrite induced hemoglobin oxidation of diabetics and non diabetics blood John Philip Tarburton, National University, USA Title: Can increased lycopene consumption reduce cardiovascular risk in

11:00-11:20	Title: Metformin benefits exceeded glycemic control Khaled Alswat, Taif University, Saudi Arabia
11:20-11:40	Title: Pioglitazone vs Voglibose on glycemic control study in type II diabetes
11.20-11.40	in Indian population Premanidhi Panda, Dr. Panda Diabetes Institute, India
	Title: Effect of gender and body weight on postprandial glucose and lipid
11:40-12:00	metabolism in adults with type 2 diabetes
	Meghit Boumediene Khaled, DjillaliLiabes University, Algeria
12:00-12:20	Title: Lost in Translation? Progress in immunotherapy for type 1 diabetes Mark R Rigby, Indiana University, USA
	Title: Prevention of new and recurrent diabetic foot ulcers
12:20-12:40	Michael Strauss, Long Beach Memorial Medical Center, USA
	Title: Chronic diabetic complications: An accelerated aging process resulting
12:40-13:00	from DNA damage and epigenetic alterations
	Subrata Chakrabarti, Western University, Canada
	Lunch Break 13:00-14:00
	Title: Nutrition, sirtuins and renin-angiotensin system: Cross talk in
14:00-14:20	metabolic regulation
14.00-14.20	
	Sergio Henrique Sousa Santos, Federal University of Minas Gerais, Brazil
14:20-14:40	Title: Diabetes, Hyperhomocysteinemia and stroke
14:20-14:40	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia
	Title: Diabetes, Hyperhomocysteinemia and stroke
14:20-14:40 14:40-15:00	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1
	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes
	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden
14:40-15:00	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil
14:40-15:00 15:00-15:20	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels:
14:40-15:00	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010
14:40-15:00 15:00-15:20	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010 Judith Aponte, Hunter-Bellevue School of Nursing, USA
14:40-15:00 15:00-15:20	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010
14:40-15:00 15:00-15:20 15:20-15:40	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010 Judith Aponte, Hunter-Bellevue School of Nursing, USA
14:40-15:00 15:00-15:20	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010 Judith Aponte, Hunter-Bellevue School of Nursing, USA
14:40-15:00 15:00-15:20 15:20-15:40 16:00-16:20	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010 Judith Aponte, Hunter-Bellevue School of Nursing, USA Coffee Break 15:40-16:00 Title: Adiponectin may improve diabetic nephropathy Hiroaki Satoh, Fukushima Medical University, Japan Title: The pattern of the rules of halves in diabetes mellitus tested with
14:40-15:00 15:00-15:20 15:20-15:40	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010 Judith Aponte, Hunter-Bellevue School of Nursing, USA Coffee Break 15:40-16:00 Title: Adiponectin may improve diabetic nephropathy Hiroaki Satoh, Fukushima Medical University, Japan Title: The pattern of the rules of halves in diabetes mellitus tested with data from Colombia
14:40-15:00 15:00-15:20 15:20-15:40 16:00-16:20	Title: Diabetes, Hyperhomocysteinemia and stroke Paul Ganguly, Alfaisal Faisal University, Saudi Arabia Title: Combination therapy to preserve residual insulin secretion in Type 1 diabetes Ludvigsson Johnny, University Hospital, Sweden Title: Anti insulin-Resistance properties of milk whey protein hydrolyzates and peptides Jaime Amaya-Farfan, University of Campinas, Brazil Title: Prevalence of normoglycemic, prediabetic and diabetic A1c Levels: NHANES 2007-2008 and NHANES 2009-2010 Judith Aponte, Hunter-Bellevue School of Nursing, USA Coffee Break 15:40-16:00 Title: Adiponectin may improve diabetic nephropathy Hiroaki Satoh, Fukushima Medical University, Japan Title: The pattern of the rules of halves in diabetes mellitus tested with

	Gundu Rao, University of Minnesota, USA
17:00-17:20	Title: An ayurvedic polyherbal formulation (Mahagni wati) in the
	management of Non Proliferative Diabetic Retinopathy (NPDR): A
17.00-17.20	preliminary study
	Amrut Salunke, Government Ayurvedic Medical College, India
	Title: Ethnic aspects in lipid and carbohydrate metabolism in patients with
17:20-17:40	type 1 diabetes mellitus
	Lubov Kolesnikova, Russian Federation, Russia
	Title: Cerebral hypoperfusion and cerebrovascular protein alterations
17:40-18:00	induced by diabetes
	Momoh Yakubu, Texas Southern University, USA
18:00-18:20	Title: The anesthetic propofol for cardioprotection in diabetes: An update
	Jinjin Xu, Wuhan University, China
	Title: Impact of diabetic microvascular complications on bone structure in
18:20-18:40	type 1 diabetes mellitus
	Vikram Shanbhogue, Odense University Hospital, Denmark
	Title: Glaucoma: Diabetes of the brain- A radical hypothesis about its
18:40-19:00	nature and pathogenesis
	Muneeb A Faiq, AIIMS, India
14.00 16.00	Panel Discussion 19:00-19:20
14:00-16:00	Poster Presentations Coalite! Connected by Posteronia Disorders & Thorony
	Cocktail Sponsored by: Pancreatic Disorders & Therapy Day 3 November 5, 2014
	ncement of New Drug/Biomarker Discovery for Treatment of DiabetesTrack
	f Diabetes Session IntroductionTrack 8: Emerging Focus in Diabetes k 9: Transplantation for Diabetes
Chair	k 3. Hanspiantation for Diabetes
Co-Chair	
	Session Introduction
09:00-09:20	Title: High density lipoproteins: The good, the bad and the not so ugly
09:00-09:20	Jane McEneny, Queen's University, UK
	Title: The protease fibroblast activation protein is a potential biomarker
09:20-09:40	and therapeutic target in diabetes and fatty liver disease
	Mark D Gorrell, Centenary Institute and University of Sydney, Australia
09:40-10:00	Title: The protective effects of GABA on human islet cells
55. 4 5 10.00	Gerald J Prud'homme, University of Toronto, Canada
10:00-10:20	Title: A novel anti-diabetes drug development program
	Moon K Song . David Geffen School of Medicine. USA

Moon K Song , David Geffen School of Medicine, USA

Coffee Break 10:20-10:40

10:40-11:00	Title: Sevoflurane pretreatment reduces highglucose-induced oxidative stress and inflammatory injury in human umbilical vein endothelial cells Suobei Li, University of Hong Kong, Hong Kong
11:00-11:20	Title: Diabetes Observatory of Colombia: A health tool to decision makers
	Diana Carolina Tamayo, Observatorio de Diabetes de Colombia, Colombia
11:20-11:40	Title: The evaluation of antioxidant system state in patients with diabetes
	mellitus in different ethnic groups
	Lubov Kolesnikova, Russian Federation, Russia
	Title: Low level of serum IGF-I increases the risk of osteoporotic fracture in
11:40-12:00	postmenopausal women with type 2 diabetes mellitus
	Ippei Kanazawa, Shimane University Faculty of Medicine, Japan
	Title: Satiety-promoting spinach thylakoids promote weight-loss and
12:00-12:20	decrease risk factors for metabolic diseases
	Caroline Montelius, Lund University, Sweden
	Title: Antihiperglycemic effect of 5-HT2 receptor stimulation induced by a
12:20-12:40	serotonin analogue
	Enrique Hong chong, Center for Research and Advanced Studies, Mexico
	Lunch Break 12:40-13:40
	Title: The population attributable fraction for the impact of obesity on
12.40 14.00	alternation of a control of the control of
13:40-14:00	diabetes: A contextual framework
13:40-14:00	Peter Congdon, School of Geography, UK
13:40-14:00 14:00-14:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases
	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA
14:00-14:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases
	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia
14:00-14:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in
14:00-14:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical
14:00-14:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia
14:00-14:20 14:20-14:40	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of
14:00-14:20 14:20-14:40 14:40-15:00	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology
14:00-14:20 14:20-14:40	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology Mohsen Khalid, National Institute of Diabetes and Endocrinology, Egypt
14:00-14:20 14:20-14:40 14:40-15:00	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology Mohsen Khalid, National Institute of Diabetes and Endocrinology, Egypt Title: Gene therapy: Potential towards type- 2 diabetes treatment
14:00-14:20 14:20-14:40 14:40-15:00	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology Mohsen Khalid, National Institute of Diabetes and Endocrinology, Egypt Title: Gene therapy: Potential towards type- 2 diabetes treatment Vineeta Sharma, Adeno Biosciences, USA
14:00-14:20 14:20-14:40 14:40-15:00	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology Mohsen Khalid, National Institute of Diabetes and Endocrinology, Egypt Title: Gene therapy: Potential towards type- 2 diabetes treatment Vineeta Sharma, Adeno Biosciences, USA Coffee Break 15:20-15:40
14:00-14:20 14:20-14:40 14:40-15:00 15:00-15:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology Mohsen Khalid, National Institute of Diabetes and Endocrinology, Egypt Title: Gene therapy: Potential towards type- 2 diabetes treatment Vineeta Sharma, Adeno Biosciences, USA Coffee Break 15:20-15:40 Title: APOE genotypes predictcardiometabolic outcomes in individuals with
14:00-14:20 14:20-14:40 14:40-15:00 15:00-15:20	Peter Congdon, School of Geography, UK Title: Epigenetics: Role in the etiology of adult diseases Rita P Raman, University of Oklahoma Health Sciences, USA Title: Clinical and genetic features of diabetes mellitus in young patients in Siberia Alla Ovsyannikova, Siberian Branch of the Russian Academy of Medical Sciences, Russia Title: A genomic study of type 2 diabetics attending the outpatient clinic of national institute of diabetes and endocrinology Mohsen Khalid, National Institute of Diabetes and Endocrinology, Egypt Title: Gene therapy: Potential towards type- 2 diabetes treatment Vineeta Sharma, Adeno Biosciences, USA Coffee Break 15:20-15:40 Title: APOE genotypes predictcardiometabolic outcomes in individuals with metformin and metformin-sulfonylurea combination therapy

16:20-16:40	Title: Aberrant activation of aldose reductase promotes insulin insensitivity, hepatosteatosis and obesity in mice in part through modulating hepatic PPAR α , LKB1/AMPK α and IRS-1 James Y Yang, Xiamen University, China
16:40-17:00	Title: Dipeptidyl peptidase IV (CD26/DPP-IV) inhibitory and cryptoprotective role of some antidiabetic plants Anand Krishna Singh, Devi Ahilya University, India
17:00-17:20	Title: Why three GCC countries are on the top ten countries for prevalence of diabetes: A close look into epidemiology, psychosocial and genetic factors Khalid Al Rubeaan, King Saud University, Saudi Arabia
	Panel Discussion 17:2017:40
	Closing Ceremony

^{**}Note: Tentative Program has been designed with the projected Speakers Names and Titles. Dates and timings in this Program are subject to change.
