

EuroSciCon

30th Edition of International Conference on

Neurology & Neuroscience Week

May 27-28, 2019 | Singapore

THEME: EXPLORE THE BRAIN STORMING INNOVATIONS IN THE FIELD OF NEUROLOGY AND NEUROSCIENCE

Website: https://neurologycongress.eurosciCon.com/

Dear Colleagues and Friends,

In this day and age, it is imperative that we can sustain and empower the exchange of knowledge, have an enormous potential to grow and flourish, touching the lives of millions and building the new health paradigm that our dynamic society is facing.

It is why, it is our honour and privilege to welcome you all to join us at the **30th Edition of International Conference on Neurology & Neuroscience Week**, brought to you by **EuroSciCon Group**, a most respected event holding profound topics that merge the knowledge of International Medicine and the current innovation scene for modern disciplines practiced today.

The conference, which is to be held in the marvellous city of **Singapore** in **Thailand** on the **27-28th of May, 2019** will not only enrich your perspective on how the diversity of disciplines will help to push forward a more cohesive and complete manner of treating disease and preventing illnesses from a broader perspective. Moreover, with the distinguished participants that will present their findings and successes, most of which have broad and proactive careers in their respective fields, I rest assured that your view of the current medical paradigm will be enlarged and nurtured with what our speakers and committees have to offer.

We look forward to having the pleasure of coinciding with you and create a medium of cooperation and exchange of ideas that will help strengthen and enrich our current global health system, even helping it transition to the brave new health paradigm for the greater good.

Best regards,

Mr. Alejandro De la Parra Solomon
