

Title: Innovative & Integrative Immunotherapy under the Yod-Ying Protocols for Chronic Diseases and Cancers.

Dr. Pilant Anantaranonkun (TM.MD.,PhD)
BVRC Functional Wellness, Bacteria & Virus Research Center / Innovative & Integrative Medical Association, Thailand.

Immunotherapy has gained more popularity and has created more hope in the treatments of cancers in recent years. More importantly, the immune system is critically involved beyond fighting off invaders and cancers, as it also plays crucial roles in metabolism, inflammation, and chronicity of illnesses. Consequently, immunotherapy can support reliefs of various health sufferings. In order to implement a safe and effective immunotherapy, the well-orchestrated properly functioning organs are essential in rendering successful treatments, facilitating healing and regaining vitality of a person in the long run.

The Yod-Ying Protocols are known for its comprehensive functional integrative medicine approach to treat different health conditions from chronic degenerative diseases to immune-related disorders and cancers. Considering the human body as a whole interconnected being, the protocols take first and foremost importance in addressing malfunctions, even of the seemingly unrelated bodily systems, along the therapeutic course for any illnesses.

An immunotherapy under the Yod-Ying Protocols implements innovative technologies to achieve laboratory reactions, yielding naturally-derived high-potency extracts of phytochemicals, active minerals, and immuno-therapeutic agents, all devoid of toxic accumulates with safety to body tissues as utmost importance. Only when the vital organs remain healthily intact during the course of therapy, then optimal functionality can be regained.

Patient's commitment and cooperation also contribute largely in achieving optimal therapeutic outcomes. The Yod-Ying Protocols take significant consideration of not only diet & lifestyle adjustments, but also the importance of facilitating medicinal bioavailability and efficacy with vigorous intake requirements throughout the therapy.
