From the analog design to the digital design.

Dr Rodolfo Badilla Rivera .

In today's dentistry everybody is digitalizing their practice , and there are severals programs that are been used , but the most known is the DSD , even tough there are some programs that can be used with the same purpose , some are more complex to use them than others , but all of them are used with the same purpose , so it is important to know different tendencies and practice the one that is easier , faster , complete ,an inexpensive .

The purpose of the conference is to let people know different tendencies that can be used in our dental practice .

Analog dentistry ,digital smile design , programs , tendencies .

Rodolfo Badilla Rivera has completed his degree as a General Surgeon Dentist at the age of 24 , in the UNAN -Leon,(Universidad Nacional Autónoma de Nicaragua)and he has a diplomate in esthetic dentistry and a international certification in oral rehabilitation and esthetic dentistry which is still under study , he was a adjunct profesor in UNAN-Leon and profesor of restorative area in UCATSE -Esteli (Universidad Católica del trópico seco ; Esteli), He has different international hands on courses with distinguished international professors and lecturers . Actually he has a dental practice dedicated exclusively to the Esthetic Dentistry in the city of Esteli Nicaragua .
