Abstract

About NAET; (Nambudripads Allergy Elimination Technique) A revolutionary technique.

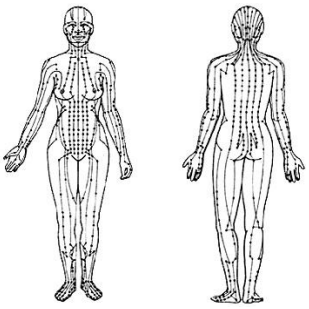

This revolutionary technique was developed by Dr Devi S Nambudripad, M.D., D.C., L.Ac., Ph.D, in 1983 in the USA and is practiced by over 16,000 medical practitioners worldwide.

NAET is a unique method to balance energy blockages in the meridians to treat allergies and all manner of ailments. NAET works on the basis that anyone can be allergic to any substance, and these allergies can cause illness. NAET combines western science, kinesiology, chiropractic, acupuncture and nutritional therapies.

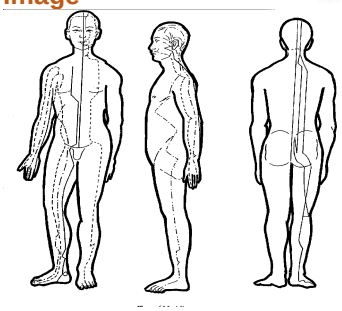

NAET is a non-invasive technique, without unpleasant blood or skin tests, injections or medication. Firstly, finding sensitive substances which trigger a reaction and then to target these with pain free and harmless treatments. NAET is structured, detailed and comprehensive.

Looking at how the technique is conducted and built from allopathy, western sciences approaches, kinesiology, chiropractic, acupuncture, and, nutrition.

Many people who are feeling poorly due to undiagnosed food allergies, may take vitamins or other supplements to increase their vitality after they get treated for the specific allergy. If they happen to be allergic to the nutritional supplements they are taking, this can make them feel worse. Only after clearing those allergies, can their bodies properly assimilate them.
Cases of patients from eczema, salmonella poisoning to scoliosis will be reviewed along with the current clinical study in autism.
