Title: ((The role of orally taking of honey bee's chitosan"Chitin"-melanin and, propolis combination on treatment of bloating, epigastric heaviness, with negative R.U.T based on endoscopic report and suppository taking abdominal distress/pain with diverticulosis (mild - left side) and, internal haemorrhoid (s) based on colonoscopy report and follow with the homeopathic remedies in the 50 years women patient with umbilical hernia - A case report))

Author's Name: Abdolrasoul Aleezaadeh
University of Applied Science and Technology/U.A.S.T and, Payaam-e-Nour/P.N.U Universities-I.R of Iran – Green Lake University, University of Pacific Albion and, Brooklyn Central Universities-the U.S.A "Assistant Prof. (U.A.S.T./P.N.U), I.R. of Iran; Associate Professor at G." L." U. and, U.P.A & Full Professor at B.C.U. - the U.S.A."

Abstract

The aim of this research is prevention of progression in epigastric heaviness and, conversion of colon mild diverticules to sever and, cancer; and, follow of these, reduce of the pain at internal area of the rectum sphincter; especially, on time of costipation. Since MELANIN Comprises a group of

biopolymers with an irregular structure that possess a dark color; and, the natural sources of melanin are fungus, plant and, animal material peal and many other components of biological origin; also, they're effective Sorbents for radionucletides and, heavy metals, and, may be used for the treatment of wastewater and metal isolation; absorb light in wide range of spectrum, absorb many other types of energy; and, stable radicals with paramagnitic properties; so, by combination to CHITOSAN as a perfect, natural, tough, cationic, biodegradable, and biocompatible polymer obtained from chitin by deacetylation; It is possessing tremendous mucoadhesive and inherent anti-microbial properties, so when it can be used as a therapeutic efficacy natural drug In, tailoring the controlled release of the low molecular weight or, negative gram molecullar abdominal/transabdominal diseases. PROPOLIS is also used for treating gastrointestinal (GI) problems – both in initial and, progressive stages. The combination of these two materials – both in orally and, suppository taking forms – there's obtain an stable treatment for prior mentioned diseases.

After some recovery stages of taking the prior mentioned materials; the patient can be follow by taking homeopathic mega molecule remedies for original destroy of the mentioned diseses; and, product a stable balancing in internal vital force.

Biography

Prof. Dr. C.P Abdolrasoul Aleezaadeh completed his Post Doctorate in (Psychology) at Approach of: Applied Clinical Cognitive Neuropsychology from USA. Prof. Dr. Aleezaadeh Completed his PhD Degrees in Psychology at the USA. He completed his master's Degree in Clinical Psychology at I. R. of the IRAN and bachelor's Degree in General Psychology at I. R. of the IRAN. He is Full Expert International Faculty Professorship Member in the Brooklyn Central University, the USA, Associate Expert International Faculty Professorship Member in the University of Pacific Albion, the USA and, Associate Expert International Faculty Professorship Member in the Green Lake (GreenLake) University, the USA. Now he is working as an Assistant Professor at P.N.U and, U.A.S.T Universities; I.R. of IRAN.

Research Interest (s)
Cognitive Sciences, Cognitive Neurosciences, Neuroimaging, Applied Clinical Neuropsychology, Brain (Cranial) Imaging, Traditional Medicine, Homeopathic Medicine and, Combination of Medical And, Psychological trends for eradicating illnesses / sicknesses, Psychology, Cognitive Neuropsychology/Neurosciences.
