Paradigm Shift in Allopathy

NUCLEOPATHY A LIVING PROOF OF BRAIN DISORDERS AT LARGE

PROF. DR. SHAHID H. SHEIKH, MD. PhD.
Senior Research Scientist
CHAIRMAN: NIDS Treatment & Research Center TRUST
LAHORE, PAKISTAN.

In the conventional allopathy, there are almost no curative treatments available for most of the neurological ailments, children born with various ailments ranged from Autism, Attention Deficit Disorder, to Cerebral Palsy Micro and Hydrocephaly.
Many parents initiated the working support groups of counseling, education & training worldwide to overcome these growing challenges with their children to better their lives.

Research continues seeking the workable solution for these ailments. As unpredictable behaviors from mutiny to partial language to very aggressive behaviors are thought to be a socio-psychological disorder, that has engaged a variety of professions to understand & develop the workable methodologies that work for some patients.
Psychiatry, Psychologist are entertaining with supportive medicine for the patient to help lead somewhat normal life. Still, it is poorly known that certain pathology went into the developmental stage, that has interfered in the sound development of the fetal brain, almost 6 months before birth.

It is that interference causing Viral Genomic Pathology contributed from the parents that has survived in the brain of the newborn in the cradle to adolescence to youth to mid & old age causing different types of ailments at different stages of life.

Therefore, counseling, repetitive physical practices (Physical Therapy) is bound to only make a very little difference, if at all, unless the pathological markers, identified and remedied in the effort to excavate the pathology and lighten up the undue burden of the inflicted neurons.

PATHOPHYSIOLOGY

The conventional Allopathic Neurology limited to the **Cytopathy**. Up until today, it provides no treatment, however intrinsic symptomatic treatments are designed by Psychiatrists, Neurologists and Neurosurgeons.

Actually, in the **Nucleopathy**[1] view of **Sheikh's Syndrome**[2], it is defined as **Multifocal Sub Nucleus Neuronitis (MFSNN).** The chronicity of this disease starts from the early developmental age in the uterine.[3]
Mother or father's chromosomes carry the Neuro invasive viral genomes, therefore, at the time of fertilization, the viral genomes survive and flourish.
First trimester, the construction of the Neuro Disk, the brain and the spinal cord development takes place.
Through the mitotic environment in the uterine equally favors the genomic proliferation and its distribution in the variety of developing Neurons sporadically. The overwhelming viral genomic proliferation at the outset, may cease the fetal development and cause a miscarriage.
If fetus survives this neopathogenesis, several nuclei of the inflicted Neurons left behind as a potential (Harboring Grounds) focus, where the contributing neuronal homeostasis will be compromised under its influence. The seed of the future ailments sown.

This is the onset of unexplainable “pain” and at the outset the “Disability”[4].
Mother’s immunity always faces this challenge to rectify this neopathogenesis.
Preamble of infant’s late miles stone, mental retardation, and many ailments root here.
physical incapacitation/disabilities originate here.
The mother & the Child health has always been a global challenge without the knowledge of Sheikh’s Syndrome MFSNN.[1,2]

Currently, the genes editing phenomenon during pregnancy has not substantiated a possibility of removal or cessation of the viral proliferating genomes during pregnancy.
The best caution against C.P. and many other off shoots of neuroviral induced problems in fetus are the pre-pregnancy screening of antibodies accumulation against these Neuro invasive viral genome.
Any number of the antibodies IgG or IgM over the normal limits are a clear indication of high-risk war against pregnancy and or complete male or female infertility[4].

C.P. exists almost in every community across the planet with no cure[5].
Patients suffering from this ailment live a very disturbed and painful quality of life.
Prominent derogatory health conditions prevail swiftly that carry a social and financial burden on the family.

Conventional allopathy has no solution but the symptomatic transitory relief. Interestingly, many physicians cater the remedial cocktail to C.P. patients.
Therefore, to decrease the frequency and inconvenience of the symptomatology.
However, it is very logical to start tracing the involvement of the Nucleopathy, right from the effected tissues involved in this ailment and track the possible neopathogenesis of C.P. & all the other possible ailment/s.[5]

The pathophysiology of the controlling neurons is never taken into an account for a possible involvement in the system’s malfunctioning.
Long behold, as we tracked this novel phenomenon and found a new revelation.
The controlling neurons nuclei overwhelmed with the Neuro-invasive viral genomic proliferation, at the time of intra-uterine development, possibly in the first trimester of the pregnancy incapacitating the fetal neuronal homeostasis and/ or development. Therefore, the inflicted neurons of a system, translates into sub normal function of the system. (The Sheikh’s Syndrome).

All diseases root in the NUCLEUS of the controlling Neurons Modern Science has shown the growing Genomic Pathology by magnifying 1 billion times that we inherited from our parents/ ancestors. Now, most of all diseases can be treated by NANO CARE to achieve back the normalcy, comfort & longevity of life.

Neuro Immune Dysfunction Syndrome (NIDS) Treatment & Research center has proven the Late Dr. Edward Wagoner PhD, of UCI California, that Nucleopathy is the new dimension of Allopathy to look deeper into the nucleus of the controlling neurons that are harboring the genomic pathology since birth, now we can, by excavating the pathology, reclaim the normalcy and comfort of daily life, worldwide for all humanity.

BRAIN RELATED DISORDERS

•ADD/ Autism * Anger Management *Allergies *Alzheimer
*Bell's & Cerebral Palsy[5] •Cognitive Disorder *Chronic Fatigue Syndrome
* Drug Addiction •Encephalitis * Hypothalamic Dysf.
* Multiple Sclerosis * Meningitis •Metabolic Disorder
•Neuralgia * Neuropathy •Parkinson's * Psychiatric disorders
* Pituitary Dysfunctions • Stroke * Teenage Drug Addiction
* Transient Body Pain * Lympho-adnopathy *Cancer

BLOOD DISORDERS

•Amenorrhea *Anemia *Aneurysms •Atherosclerosis
•Hypohemoglobinemia * Hyperlipidemia

HEART & LUNGS

*Asthma •CAD * Hypertension •Hypo/ hyperthyroidism
• Sudden Tachycardia * Schizophrenia * Respiratory Failure

GASTROINTESTINAL DISORDERS

*Diabetes Mellitus *Endocrine Disorders
*Gastroenteritis •Gastric Ulcer •IBS
* Liver Dysf.

REPRODUCTIVE DISORDERS

* Impotence * Infertility *Chromosomal Disorder
* Fetal Gender Selection * Gynecomastia * Neoplastic-Tumors
* Nephropathy * PCOS •Recurrence of Minor Infections

Greetings,
It might be a surprise for you to receive this piece of communication.
However, it is a vital information for the parents & the world leaders to embark on the new horizon of scientific innovation and become part of the New "Nano Care" of healthcare systems, to save the lives of ailing humanity.
We are opened for the membership to the participants of your team, who are directly or indirectly involved in the above-mentioned Ailments healthcare services.

Only the members can access our Diagnostic & Treatment support.

For further information, please send a letter of interest to the following email address.
PROFDRSHAHID@GMAIL.COM

Thank you & Best Regards

Sincerely,

Prof. Dr. Shahid Hussain Sheikh
