The importance of occupational health and safety aspects in every work carried out in PT PLN (Persero) Java Bali Control Center as in the sub-field occupational health and safety of PT PLN (Persero) Java Bali Control Center is to ensure the health of all employees of PT PLN (Persero)50 Java Bali Control Center which is the application of safety management system and occupational health. Health is considered as an important factor to achieve the company's goals, one of which is able to operate the power system Java Bali well and safely. Factors that can potentially cause work-related diseases in a dispatcher is the frequent viewing of the computer screen during working hours and too long sitting which can lead to interference in the eyes and disorders of the back and spine/musculoskeletal. Working demands of a Java Bali system operator requires working on these conditions. It should be noted by the authorities in fulfilling the rights of a dispatcher that is to always stay healthy and in good condition. It is therefore necessary to have a healthy and in good condition. It is therefore necessary to have a healthy dispatcher program such as sports with dispatchers, protective installation on computer screen, counseling by hazards physicians and how to address potential hazards in dispatcher work to prevent potential work – related diseases in the dispatcher work environment.
