

Title: Priorities in Pediatric Care and Emergency Medicine

Name: Angela Cristina Marques Valente, MD

Anthroposophic Medicine Brazilian Association, São Paulo - Brazil

WORKSHOP - 90 minutes

Overview: The healthcare model based on Evidence Medicine Science is a worth and well stablished *modus operandi.* This on going model works adequately to approach the physical body, the dense aspect of the human being. However, humans are beyond physical structures and diseases are also linked to aspects beyond physical structures as well. It is priority to enlarge Medical Science horizon and develop clear thinking about forces and dynamics of illness in instances further on it's physical-quimical presentation. Integrative Medicine, no longer complementary or alternative in concept and in practice, comes to guide integration of medical cognitive approach among physical body, vitality, soul and spirit. Anthroposophy as a Spiritual Science presents conception and practice to support Anthroposophic Medicine as a consistent model of Integrative Medicine.
This workshop propounds to bring healthcare professionals an ideia about Integrative Medicine Care based on Anthroposophic Medicine in practice. Not as complementary therapies, but as integration of physical body, vitality, soul and spirit based on cognitive methods and expecting cognitive results. The intention is to draw attention to Pediatric scientific integrative Medicine as a field of great need of development.

Objective: Broaden the healthcare assistance beyond physical-quimical pathological perspective.
Bring attention to integrative medicine as priority in Pediatric care and emergency Medicine in clinical and scientific fronts.
