Title: The Awakening of One-Self within the Wellness Movement (Communication, Progress, Self-Reflection, Honesty – Sustainability).

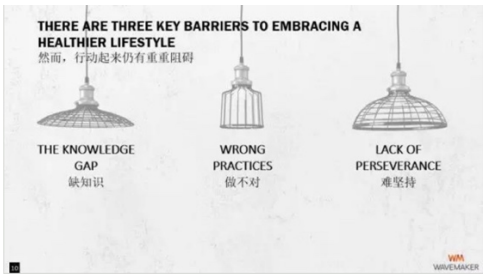

Michael Koethner: From Germany, residing in Beijing, China.
Bespoke Network (Company) – Beijing.

Abstract of a "Conversation" about the profound need for much deeper and meaningful dialogues, on all aspects life has to offer in this 3D realm. Much has been written and talked about but there is a never ending resurgence of previously suppressed and repressed issues that affect our daily lives in a very negative manner. Forget about numbers for a few minutes and allow your heart to listen to your soul and use your ego as it was meant to be used for – as a CPU to coordinate DI / DO (Data-In / Data-Out) and distribute it accordingly as well as organise the flow in a manner that is beneficial for the system to benefit from and grow. There is a much higher demand to the existence and experience of life than the boring monotonous performance and movements.
I like to start with a statement made by Alex Collier in the 90's and it has been given to humanity through the higher channels. Please reflect on these words for a moment before you continue with your life:

"Purpose of Human Life => Profound Self-Determination and Responsible Freedom. Be truly and deeply Self-Confident and Free. To unconditionally be Responsible for Oneself – without being Coerced to accept some Higher Authority".
Allow your Self to dwell on that statement for a while and feel its impact.

It will eventually and radically change the perception of our lives; this change and growth cannot be stopped. How does the business community adapt and cater for this change in our perception; as the old and tried way of providing therapy and treatments, as well as customer service is no longer sufficient enough to justify the ever increasing and deep rooted need to excel in one's growth. (290 words)

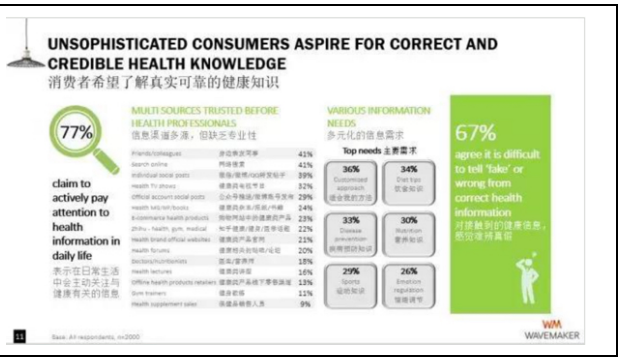

Figures if any (BW/Color):

Wellness Now a $4.2 Trillion Industry

The world wellness market grew 12.8% in just the last two years: from a $3.7 trillion industry in 2015 to $4.2 trillion in 2017. That's according to a new research report–the 2018 Global Wellness Economy Monitor–released today by the Global Wellness Institute. A little economic context? The wellness industry grew 6.4% annually, nearly twice as fast as global economic growth (3.6%) from 2015-2017. And the consumer spend on wellness ($4.2 trillion) is now more than half as much as total global health expenditures ($7.3 trillion). Every single one of the ten wellness sectors–from wellness tourism to fitness & mind-body to workplace wellness–clocked strong recent growth.

Biography

Michael holds various Diplomas in Manual Therapy from the Australian College of Natural Therapy in Sydney. He also has various other forms of education in the field of Energy Healing and from within other industries. He currently works in China and has his own company providing consulting services to interested clients, who are brave enough to explore the hidden gems of the Alternative and Complementary Industry.
