Abstract 6th INTERNATIONAL CONFERENCE ON UROLOGY AND RENAL HEALTH

HoLEP - a value based health care (VBHC) treatment of BPH

Bothmann T, Daniels-Hepnar V

Focusing on HoLEP (Holmium Laser Enucleation of the prostate) we discuss the VBHC and its benefits for patients & health care provider, funder and professionals. In Germany, 2019 9,5 % of all BPH surgical therapy has been done by HoLEP (1).
HoLEP is an efficient, long term validated procedure to treat BPH (2,3).
In this speech we discuss the HoLEP procedure, surgical and mentoring aspects and its VBHC after applying the ROI tool created by Lumenis Ltd (4). This indicates HoLEP as a cost effective procedure over TURP.
