MARKET ANALYSIS

Nursing is a health-care career that helps people recover from illness. They are self-contained and have a limited scope of practise. In hospitals, they act as a backbone, collaborating with all members of the healthcare team to provide the care that each patient demands. Nurses provide support to patients and their families as they work to overcome their illnesses. They serve as educators for the entire community, educating individuals and groups how to improve or maintain their health.

Nursing positions include medical practitioners, doctoral-level researchers, and physician assistants, to name a few. Nurses are health-care professionals who give specialised, one-on-one care to their patients. Registered nurses are also in high demand; according to research, employment of registered nurses is predicted to grow by 22% from 2017 to 2027, far faster than the national average.

ABOUT VENUE

The city Barcelona is unique. The city is captivating, offering everything from days spent exploring the Gothic Quarter to afternoons at the beach to late-night parties. Barcelona's genuine crown jewel is Antoni Gaud's work, even though the city's busy mercados and tapas bars are also deserving of all the praise they receive in travel guides. His famous works, including as the mind-blowing Basilica of La Sagrada Familia, are instantly identifiable and have sparked the wanderlust of millions. Even in the midst of the tourists (especially in the summer), you'll find your own Mediterranean magic at any time of year.
