MARKET ANALYSIS

The market for animal feed in the Netherlands is anticipated to increase at a CAGR of 1.76% over the forecast period, rising from US$3,375.516 million in 2020 to US$3,813.993 million in 2027. Rapid urbanisation and increased demand for meat and other end products are the main factors driving the growth of the animal feed market in the Netherlands. Wageningen University & Research estimates that the typical Dutch citizen consumes 76 kilogrammes of beef annually. The size of the world market for animal health was estimated at USD 58.66 billion in 2022, and it is projected to increase at a CAGR of 8.8% from 2023 to 2030.

The market for veterinary drugs in Europe was valued at USD 6.9 billion in 2022, and from 2023 to 2030, it is projected to expand at a compound annual growth rate (CAGR) of 7.3%. The important elements projected to drive market expansion in the upcoming years include rising zoonoses awareness, the humanization of pets, the availability of pet insurance, and R&D initiatives by industry participants. For instance, Boehringer Ingelheim started more than 450 clinical investigations in 2020. The business received authorizations for more than 240 products, including Aservo Equihaler in the EU for the alleviation of severe equine asthma.
