Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

The global polymer industry is expected to grow with a CAGR of 3.9% over 2015-2022. The demand for polymer is driven by growth in end use markets, such as packaging, automotive, infrastructure, transport rails, and telecommunication mainly from emerging economies. Polymer is continuously substituting metals, glass, paper, and other traditional. The global Polymer Filler Market size exceeded USD 45 billion in 2015. Increasing demand for high strength and lightweight materials in the automotive and industrial applications is likely to propel the low-density Polymer Filler Market. Polymer fillers due to their improved impact strength are expected to replace costly plastic resins across various industrial products soon. Polymer fillers are likely to gain wider acceptance in various industrial products due to the increasing use of low-cost fillers in countries such as the U.S, India, Germany, Brazil, etc. Stringent guidelines and environmental regulations are expected to influence the global Polymer Filler Market.The global polymer industry segmented by regions:North America, Europe, Asia Pacific.

About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

Austria is a landlocked country in south-central Europe that is mostly hilly. Despite Austria's full participation in the supranational European Union since 1995, it forms the so-called "neutral core" of Europe alongside Switzerland (EU).

Austria's significance may be traced in large part to its geographical location. It sits at the crossroads of European travel, connecting east and west over the ancient Danubian trade route and north and south through the spectacular Alpine mountains, entangling the nation in a variety of political and economic systems. This little country underwent more than a quarter century of social and economic instability, as well as a Nazi dictatorship, in the decades after the 1918 collapse of Austria-Hungary, the multinational empire of which it had been the heart. Nonetheless, the creation of permanent neutrality in 1955, together with the evacuation of the Allied forces who had occupied the nation since World War II's end, enabled Austria to evolve into a modern state.

A peaceful and socially progressive nation with a thriving cultural life reminiscent of its former international musical splendour Its social and economic institutions, too, have taken on new shapes and a cooperative spirit, and, while political and social difficulties persist, they have not exploded with the ferocity seen in other Continent nations. The ancient city of Vienna (Wien), the historical seat of the Holy Roman Empire and a city famed for its architecture, is Austria's capital..
