INVITAION

CARDIOLOGY CONGRESS 2023

Cardiology Congress 2023 would like to engage and bring together a significant number of distinguished academics and industry in an interdisciplinary platform to provide a comprehensive overview of current research and discoveries. You will also explore the challenges and opportunities in converting research into commercialization in the field of biotechnology.

This premier interdisciplinary conference will bring together Academic Researchers, Professionals, Delegates, Entrepreneurs, and Industrialists from around the world to share and exchange the most recent updates and breakthroughs in Cardiology.

As part of the overall Keynote Lectures, Young Research Forum Lectures, educational seminars, scientific symposia, video presentations, and E-poster presentations, the organising committee has arranged a comprehensive scientific and educational programme. This conference will contribute to a greater understanding of developing cardiology.

It's better to attend the congress now than never if you want to support your research publication. We foretell that your advancement and unwavering commitment will ensure the success of the Cardiology Congress in 2023.

With a focus on the vital advancement of advancements and innovative solutions via the most cutting-edge technologies and Practices in biotechnology based research, the conference officially welcomes the dynamic scholars, academicians, specialists, and student delegates and appreciates your presence.

We are overjoyed to have you join us at the Cardiology Congress in 2023.

Regards,
Alexandra Benilo | Program Manager

MARKET ANALYSIS

Statistics from the World Health Organization reveal that, out of all diseases, cardiovascular disease is the leading cause of mortality worldwide. More than three-quarters of deaths in developing and impoverished nations are caused by cardiovascular disease. The magnitude of the interventional cardiology market has been displayed. The World Health Organization predicts that starting in early 2023, the market size may grow. The article also covers how cardiology contributes to the worldwide market and the decline during the period when pandemics weren't widely publicized (COVID-19).

According to the WHO, cardiovascular disease is the leading cause of mortality worldwide. The global death rate is depicted in the graph below. These illnesses are occurring more frequently as the global elderly population rises. Because of this, dietary modifications, high blood pressure, excessive smoking, and alcohol use are important risk factors for heart disease.

Type 2 diabetes (T2D) is changing into a lot of common in Asian country, and upset (CVD) is that the primary reason for death during this cluster. CAPTURE was a 13-country, international, multicentre, non-interventional trial that checked out the prevalence of CVD, coronary-artery disease CVD (AsCVD), and CVD subtypes among T2D patients.

Between December 2021 and September 2022, 816 patients with T2D (median age, sixty nine years [interquartile range: 62–75]; median polygenic disorder length, 11.2 years [interquartile range: five.7–18.7]) were recruited throughout routine clinical visits at secondary care centers in Thailand.

WHY TO ATTEND

Cardiology 2023 differs from previous conferences in that it aims to create an expert community among persons working in the same profession. Participating with colleges or large organisations also provides researchers with an incredible opportunity to share their study and seek assistance in furthering their outstanding ideas. Clinical grads are given an excellent opportunity to select their future by discussing their interests with experts. These sessions include novel treatment procedures as well as information on how to use them in the future.

ABOUT VENUE

Thailand is a Southeast Asian country. It's known for tropical beaches, opulent royal palaces, ancient ruins and ornate temples displaying figures of Buddha. In Bangkok, the capital, an ultramodern cityscape rises next to quiet canalside communities and the iconic temples of Wat Arun, Wat Pho and the Emerald Buddha Temple (Wat Phra Kaew). Nearby beach resorts include bustling Pattaya and fashionable Hua Hin.

Bangkok, Thailand's capital, is a large city known for ornate shrines and vibrant street life. The boat-filled Chao Phraya River feeds its network of canals, flowing past the Rattanakosin royal district, home to opulent Grand Palace and its sacred Wat Phra Kaew Temple. Nearby is Wat Pho Temple with an enormous reclining Buddha and, on the opposite shore, Wat Arun Temple with its steep steps and Khmer-style spire.

Bangkok is one amongst the very few cities that are at the vanguard of experimentation projects and experimental research pursuits in the world, leave alone South Asia. One of the primary causes for this development is owing to every high-level that will be routinely programmed to occur in world-class venues throughout the city. Representatives and delegates from throughout the world look forward to taking part in their favorite conferences in the city, to discover more regarding the most current progress taking place in their individual disciplines as well as to create influential enterprise relationships that will profit their professions and experimental pursuits.
