MARKET ANALYSIS

The Global Cardiology Market is expected to grow at a CAGR of around 8.8% from 2020 to 2027 and reach a market value of over US$ 24.3 Bn by 2027.

The expansion of the Cardiology Market is majorly due to the massive patient population and the high mortality rate of coronary artery disease, stroke, hypertensive heart diseases, inflammatory heart diseases, obesity, and rheumatoid heart diseases are expected to increase the demand for cardiovascular devices, including interventional cardiology devices.

Cardiovascular Disease can include angina, arrhythmia, atherosclerosis, congestive heart failure, coronary artery disease, hypertension, myocardial infarction, or other disorders.

Due to COVID-19, the market for interventional cardiology was estimated to be worth $11.1 billion globally in 2020 as opposed to over $14 billion in 2019. Incredibly, $16.2 billion is predicted to be the amount of the global market by 2027.

The global interventional cardiology devices market was worth USD 11.95 billion in 2021 and is predicted to increase at a compound annual growth rate (CAGR) of 3.7% between 2022 and 2030.
