3RD INTERNATIONAL CONFERENCE ON

CARDIOLOGY RESEARCH

DECEMBER 07- 09, 2023 | MADRID, SPAIN

http://cardiologymeeting.pulsusconference.com/

INVITATION

CARDIOLOGY CONFERENCE 2023

Cardiology Conference 2023 would like to engage and bring together a significant number of distinguished academics and industry in an interdisciplinary platform to provide a comprehensive overview of current research and discoveries. You will also explore the challenges and opportunities in converting research into commercialization in the field of biotechnology.

This premier interdisciplinary conference will bring together Academic Researchers, Professionals, Delegates, Entrepreneurs, and Industrialists from around the world to share and exchange the most recent updates and breakthroughs in Cardiology.

As part of the overall Keynote Lectures, Young Research Forum Lectures, educational seminars, scientific symposia, video presentations, and E-poster presentations, the organising committee has arranged a comprehensive scientific and educational programme. This conference will contribute to a greater understanding of developing cardiology.

It's better to attend the congress now than never if you want to support your research publication. We foretell that your advancement and unwavering commitment will ensure the success of the Cardiology Congress in 2023.

With a focus on the vital advancement of advancements and innovative solutions via the most cutting-edge technologies and Practices in biotechnology based research, the conference officially welcomes the dynamic scholars, academicians, specialists, and student delegates and appreciates your presence.

We are overjoyed to have you join us at the Cardiology Congress in 2023.

Regards

ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

Statistics from the World Health Organization reveal that, out of all diseases, cardiovascular disease is the leading cause of mortality worldwide. More than three-quarters of deaths in developing and impoverished nations are caused by cardiovascular disease. The magnitude of the interventional cardiology market has been displayed.

The World Health Organization predicts that starting in early 2023, the market size may grow. The article also covers how cardiology contributes to the worldwide market and the decline during the period when pandemics weren't widely publicized (COVID-19).

According to the WHO, cardiovascular disease is the leading cause of mortality worldwide. The global death rate is depicted in the graph below. These illnesses are occurring more frequently as the global elderly population rises.

Because of this, dietary modifications, high blood pressure, excessive smoking, and alcohol use are important risk factors for heart disease. Type 2 diabetes (T2D) is changing into a lot of common in Asian country, and upset (CVD) is that the primary reason for death during this cluster. CAPTURE was a 13-country, international, multicentre, non-interventional trial that checked out the prevalence of CVD, coronary-artery disease CVD (AsCVD), and CVD subtypes among T2D patients.

Between December 2021 and September 2022, 816 patients with T2D (median age, sixty nine years [interquartile range: 62–75]; median polygenic disorder length, 11.2 years [interquartile range: five.7–18.7]) were recruited throughout routine clinical visits at secondary care centers in Madrid.

TARGET AUDIENCE

- Surgeons
- Cardiologists
- Nurses
- Research college students

WHY TO ATTEND

Cardiology 2023 differs from previous conferences in that it aims to create an expert community among persons working in the same profession. Participating with colleges or large organisations also provides researchers with an incredible opportunity to share their study and seek assistance in furthering their outstanding ideas. Clinical grads are given an excellent opportunity to select their future by discussing their interests with experts. These sessions include novel treatment procedures as well as information on how to use them in the future.

ABOUT VENUE

The capital city of Spain, Madrid is most popular for its cultural and artistic heritage. It also has the liveliest nightlife in the world. It is a cosmopolitan city which is the main centre of business as well as the seat of the government. It is also the political centre of Spain.

Located in the centre of the Iberian Peninsula, Madrid is the largest city in Spain. With a population of over 3.3 million, the city is best known for its cosmopolitan nature. The city provides too a wide range of things to do, places to eat and it has all the facilities that a tourist needs. The city provides many conference resorts, leisure facilities and some of the best restaurants in Spain. It is also a great place for shopping, theatre, opera, museums, parks and more. The international airport of Madrid has three terminals and is the busiest airport in Spain. It is an amazing place for the children as well as there are numerous theme parks, excursions and zoos to keep them occupied. It is also a place to spend some romantic evenings in the stunning gardens and parks that provides tranquillity.

Spain's broad sweep of architectural history provides a glorious backdrop to city life, from medieval mansions and royal palaces to the unimagined angles of Spanish contemporary architecture, from the sober brickwork and slate spires of Madrid baroque to the extravagant confections of the belle époque. Put simply, this is one beautiful city.
