3rd INTERNATIONAL CONFERENCE ON

NEUROLOGY AND NEUROLOGICAL DISORDERS

DECEMBER 14-16, 2023 | ROME, ITALY

https://neurologyconference.pulsusconference.com/

INVITATION

NEUROLOGY 2023

Neurology 2023 aims to bring together all of the world's leading neurologists, psychologists, researchers, neurosurgeons, neuro-scientist's, medical professionals, fellowship bearers, residents, pharmaceutical companies, and healthcare workers.

The gathering's subject matter, " An Arousing Look at the Latest Detection and Therapy of Neurological Disorders" suggests that Neurology 2023 will be a remarkable platform for investigating advances in Neurology and Neurological disorders. The main improvements in methods, materials, and process changes related to the treatment of neurological and neurological disorders will be addressed at this meeting, and the results of the procedures will be shared. This meeting will provide participants from Medical Universities and Neuro-pharmaceutical firms with a once-in-a-lifetime chance to engage with industry-leading Neurologists, Psychiatrists, Neurosurgeons, and Business people.

Neurology 2023 will not only serve as a place for the biggest meeting of Neurologists, and associated professionals, but it will also seek to disseminate knowledge on developments in the ever-changing field of Neurology.

Keynote addresses, plenary sessions, and oral and poster displays are all part of Neurology 2023. Professionals interested in participating can register for Neurology 2023. Register quickly to take advantage of the exciting early bird deals.

MARKET ANALYSIS

The worldwide neurology market will increase from USD 33.5 billion in 2019 to USD 39.4 billion in 2024, with a 3.5% CAGR (Compound Annual Growth Rate) over this period. In contrast, the market for neurological biomarkers worldwide was estimated to be worth USD 6.1 billion in 2020. From 2020 to 2028, analysts project it to expand at a CAGR of 12.9%.

According to a recent WHO survey, it appears that neurological disorders such as Alzheimer's and dementia, epilepsy, and others account for more than 12% of deaths worldwide on average, and it is also predicted that the number of lives lost due to neuro disorders will rise from 95 million in 2015 to 103 million in 2030.

The government has raised funds for research and development (R&D) activities, advancements in the field of neuroscience and neuro-technology, increasing healthcare expenditure, rising geriatric population, and improving healthcare infrastructure, which makes a positive thrust to the market growth.
