About Chemistry and Medicinal Chemistry

PULSUS
WWW.PULSUSCONFERENCE.COM

Chemistry and medicinal chemistry are disciplines at the intersection of chemistry, especially synthetic chemistry, and pharmacology and various other biological specialties, where they're involved design, chemical synthesis and development for market of pharmaceutical agents, or bio-active molecules. especially , medicinal chemistry in its commonest practice—focusing on small organic molecules—encompasses synthetic chemistry and aspects of natural products and computational chemistry in close combination with chemical biology, enzymology and structural biology, together aiming at the invention and development of latest therapeutic agents. Practically speaking, it involves chemical aspects of identification, then systematic, thorough synthetic alteration of latest chemical entities to make them suitable for therapeutic use. within the scope of its subject, chemistry occupies an intermediate position between physics and biology. it's sometimes called the central science because it provides a foundation for understanding both basic and applied scientific disciplines at a fundamental level.
