MARKET ANALYSIS

The market for Dental care in Italy was assessed at $0.6 billion in 2022; from 2022 to 2030, it is anticipated to rise at a compound annual growth rate (CAGR) of 5.25%, reaching $1.36 billion. From 2005 to 2021, health spending in Italy ranged between 8.1% and 9.6% of GDP. More specifically, it increased from 2005 to 2009 before gradually declining thereafter. The overall healthcare expenditure (public, private, and out-of-pocket) reached its peak in 2020 and reached 9.6% of the GDP as a result of the country's response to the COVID-19 pandemic.

Devices are used by Dental professionals to treat individuals with Dental problems. Instruments for examining, modifying, curing, repairing, and removing teeth and other Oral tissues are among them. The tools that are used to examine, repair, extract teeth, and work on tissues are known as standard instruments. Italian Dentists presently face a variety of difficulties, just like those in many other European nations. Despite continuously increasing, the number of patients has not yet stabilised.

Aside from the misunderstandings about the significance of Dental health that have already been mentioned, this reality has a direct bearing on the current unemployment issue. First-generation immigrants, elderly patients, and low-income families are three social groups that are already underrepresented and exhibit this tendency outwardly. The cornerstone of a therapeutic strategy that has been demonstrated to be highly efficient, visually pleasant, and cost-effective for patients and healthcare providers alike, preventative and Restorative Dental treatment will decline if this tendency is not successfully countered. Additionally, the epidemic is undermining the holistic approach to medicine, a forward-thinking and inclusive vision for the future of healthcare that focuses on the patient's whole well-being and in which dental health has a natural place. The number of Dental implants and oral procedures performed has increased as a result of the ageing population.

TARGET AUDIENCE

- Dentists
- Dental auxiliaries
- Health Care Associations
- Dental universities
- Dental educators
- Dental practitioners
- Clinical experts
- Medical Colleges
- Research Faculty
- Dental Hygienists
- Diagnostic Laboratory professionals
- Business entrepreneurs

ABOUT VENUE

Rome, the capital of Italy, is a city with a rich history that spans over 2,500 years. It was once the center of the Roman Empire, which played a significant role in shaping Western civilization. Today, Rome is a bustling metropolis with a mix of ancient and modern architecture, world-class museums, delicious cuisine, and lively neighborhood. Iconic landmarks of Rome include the Colosseum, the Roman Forum, and the Pantheon. The Vatican City is an independent city-state within Rome and the seat of the Catholic Church. It is home to St. Peter's Basilica and the Sistine Chapel. The Roman Forum, located nearby the Colosseum, was the center of political and social activity in ancient Rome. It was the site of public speeches, political rallies, and important ceremonies. The ruins of the Forum provide a glimpse into the daily life of the Roman Empire. The Pantheon is another iconic landmark in Rome. It was built in 27 BC as a temple to all the gods and is now a Catholic church. The Pantheon features a massive concrete dome with an oculus at the top, which lets in natural light. The dome is an engineering marvel, and it is still considered one of the largest unsupported domes in the world.
