MARKET ANALYSIS

With increase in prevalence of ear, nose and throat disorders (ENT) in geriatric people the demand of ENT devices expected to drive the ENT devices industry rapidly over the upcoming years. Expanding levels of healthcare awareness among patients and healthcare professionals expected to increase the growth of the market over the forecast period.

Presence of sophisticated healthcare infrastructure in the communities, favourable government initiatives led to growth and demand for ENT devices across the under developed countries due to the extensive research and development targeted at developing technologically advanced products.

Importance and scope :

Otorhinolaryngology is the branch of medicine deals with diagnosis, treatment and other problems related to ears, nose and throat, as well as the head and neck, mouth, sinuses, and larynx. Increasing use of some of the electric systems is partially caused by the growing attractiveness of access control systems which take less time for diagnosis, treatment and fewer damages during the time of surgery with minute pain. Increasing age leads to increase risk for otorhinolaryngology disorders. This results in the use of advanced laser and radiofrequency technology during surgical and diagnostic procedures and is expected to drive ENT devices market size rapidly in coming forecast periods.

ABOUT VENUE

Dublin is the capital and largest city of Ireland. On a bay at the mouth of the River Liffey, it is in the province of Leinster, bordered on the south by the Dublin Mountains, a part of the Wicklow Mountains range. At the 2016 census it had a population of 1,173,179, while the preliminary results of the 2022 census recorded that County Dublin as a whole had a population of 1,450,701, and that the population of the Greater Dublin Area was over 2 million, or roughly 40% of the Republic of Ireland's total population.

A settlement was established in the area by the Gaels during or before the 7th century,followed by the Vikings. As the Kingdom of Dublin grew, it became Ireland's principal settlement by the 12th century Anglo-Norman invasion of Ireland. The city expanded rapidly from the 17th century and was briefly the second largest in the British Empire and sixth largest in Western Europe after the Acts of Union in 1800. Following independence in 1922, Dublin became the capital of the Irish Free State, renamed Ireland in 1937.

Dublin is a centre for education, arts and culture, administration and industry. As of 2018, the city was listed by the Globalization and World Cities Research Network (GaWC) as a global city, with a ranking of "Alpha minus", which places it as one of the top thirty cities in the world
