Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

Nanomaterials has been the greatest impetus to technological and industrial development in the 21st century and guarantees to impact several sectors such as of nanomaterials, nanotools, and nanodevices of the world economy, as proved by double-digit growth rates. And has been recognized as the resource for the next industrial revolution. The nanotechnology-based products are now entering the consumer market that had a huge effect on industrial sector.

By 2025, the global Nanotechnology market is expected to exceed the US$125 Billion mark. The nanomaterials have the highest share in the global nano-technology market. This includes well developed industrial nanotechnology applications such as nanoparticle-based nanolithographic tools, nanoscale electronic memory, sunblock products and nanocatalyst thin films and nano-thin film solar cells. Nanodevices segment captured least share of the global nanotechnology market. The nanotools accounted for second highest share of the nanotechnology market. Nanolithography tools dominates the global nanotools component market.

Biomedical, consumer and electronics applications ought to demonstrate the highest projected CAGR rates (i.e., 29.9%, 27.9%, and 20.5%, respectively) throughout the forecast period.

The National Nanotechnology Initiative (NNI) receives quite $1.4 billion from the 2017 Federal Budget, for affirming the necessary role that nanotechnology continues to play within the Administration's innovation agenda.
