MARKET ANALYSIS

The demand for general surgical equipment was valued USD 14.1 billion globally in 2018, and from 2019 through 2026, it is anticipated to increase by 8.5 percent annually. A rise in surgical procedures done as well as developments in the industry's technology are anticipated to drive the market. A rise in the demand for procedures can be attributed to factors such as patients' greater sensitivity, the prevalence of osteoporosis, the high incidence of heart and gastrointestinal diseases, and other factors.

Additionally, the market is anticipated to grow as a result of the increase in interest in robotic, computer-assisted, and minimally invasive surgery. The market is anticipated to be driven by technology advancements and the uptake of sophisticated surgeries in developing nations. Only recently has the robots and computer-assisted sector started to take off.

Because of this uptick, it is becoming more important than ever to evaluate, forecast, and analyse the market for minimally invasive devices. Due to the quick evolution of the sector with the use of technology, medical device companies that can introduce new breakthrough equipment will be rewarded with major rewards. This escalation increases the need for analysis, research, and growth projections for the market for minimally invasive products. Due to the industry's quick expansion in the usage of technology, medical device companies that can introduce new innovative equipment will be rewarded with enormous rewards.

ABOUT VENUE

The capital and largest city of Thailand is Bangkok, also known as Krung Thep Maha Nakhon and Krung Thep in colloquial usage. As of 2020, the city's anticipated population was 10.539 million, or 15.3 percent of Thailand's total population. It is located in the central Thai delta of the Chao Phraya River and spans an area of 1,568.7 square kilometres (605.7 sq mi). Bangkok is an extreme primate city, dwarfing Thailand's other metropolitan centres in both size and significance to the national economy, with over 14 million people (22.2 percent) residing inside the surrounding Bangkok Metropolitan Region as per the 2010 Census.

Bangkok is the 69th-largest province in Thailand, with a total size of 1,568.7 square kilometres (605.7 sq mi). The built-up urban region makes up roughly 700 square kilometres (270 sq mi) of this total area. In terms of land area, it is rated 73rd in the globe. In order clockwise from the northwest, the urban expansion of the city extends into portions of the six neighbouring provinces that it borders: Nonthaburi, Pathum Thani, Chachoengsao, Samut Prakan, Samut Sakhon, and Nakhon Pathom. These provinces—with the exception of Chachoengsao—along with Bangkok make up the Greater Bangkok Metropolitan Region.

Bangkok is a popular tourist destination worldwide. With little over 20 million overnight visitors in 2017, Bangkok surpassed London to be named the world's top destination city by foreign visitor arrivals among the 162 cities included in MasterCard's Global Destination Cities Index 2018. Its rating from 2017 was repeated here (for 2016). Bangkok was placed fourth in the Top City Destinations Ranking for 2016 by Euromonitor International. Bangkok received the title of "World's Best City" for four years in a row, from 2010 to 2013, according to a reader survey conducted by Travel + Leisure magazine. Bangkok is frequented by the majority of foreign visitors to Thailand because it serves as the country's primary entry point.

Domestic travel is also often used. In 2010, Bangkok welcomed 26,861,095 Thai and 11,361,808 foreign visitors, according to the Department of Tourism. 15,031,244 visitors made reservations for lodging, taking up 49.9% of the 86,687 hotel rooms in the city. In rankings for the world's top tourist destinations for 2017, Bangkok again claimed the top spot.
