PULSUS brings in a new spin on conferences by presenting the latest scientific improvements in your field. Listen to motivating keynotes from thought leaders, or rub elbows with pioneers across the globe. Spain is all set for an amazing event as PULSUS proudly presents the "6th International Congress on Microbiology and Infectious Diseases" slated on July 26-27, 2021 | Webinar.

PULSUS cordially welcome researchers, academicians, students and business professionals in the field of Microbiology professionals from around the world to participate in the upcoming Micro Infectious diseases 2021. The meeting for this year will revolve around the theme "**Novel Research Discerning for a Disease-Free Existence**" thus relaying the most cutting edge findings in the field of Microbiology.The two day meeting is going to be an event to look forward to for its enlightening symposiums & workshops from established experts of the field, exceptional keynote sessions directed by the best in the business. It will also prove to be a brilliant open door for the representatives from Universities and Institutes to cooperate with the world class researchers and an outstanding opportunity for businesses keen at expanding their global market reach. Interested individuals can confirm their participation by registering for the conference along with their colleagues. Register soon and avail exciting early bird discounts.

About PULSUS

PULSUS
WWW.PULSUSCONFERENCE.COM

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

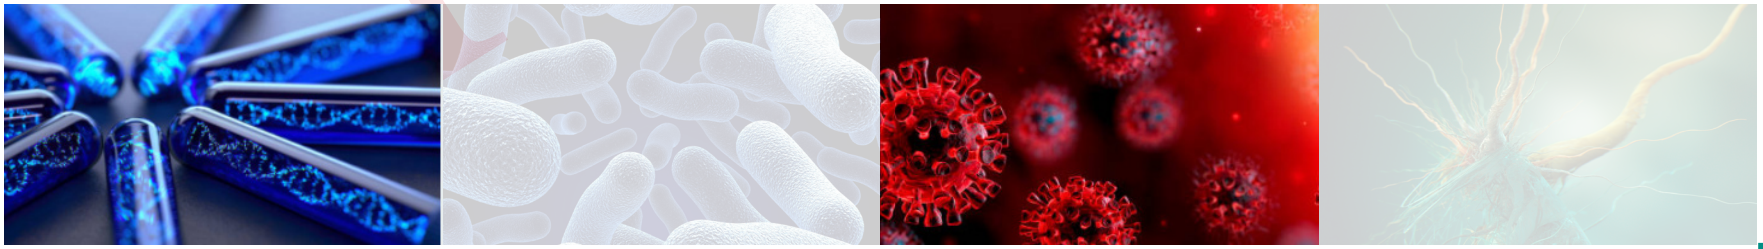

Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

In-vitro diagnostics for infectious diseases were estimated at USD 16.3 billion in 2019 and are expected to develop to a CAGR of 6.2 percent from 2019 to 2027. Increased external funding for research and development (R&D) and favourable government policies are two main growth drivers for the IVD infectious disease industry. The rapid rise of the global geriatric population is one of the key drivers for market growth as aging is directly proportional to several chronic diseases.

The IVD demand for infectious diseases is expected to be driven by an increase in the risk of target diseases, increasing health consciousness, and a transition toward self-care clinical devices. Technological advancements in the IVD market for infectious diseases have led to the introduction of innovative IVD tools. This is also associated with costs, as well as a lack of a strict regulatory structure, which is stifling market development.

Analytical instruments include machines and equipment that provide automation processes and mixing samples and reagents. Commercially available IVD kits aid in disease diagnosis by detecting and quantifying infectious microorganisms, viral load, and blood antigens using PCR.

However, molecular diagnostics is expected to be the most common segment by 2027, thanks to the rising demand for responsive, reliable, and fast new-age devices including advanced IVD kits for diagnosing infectious diseases. Furthermore, new-age molecular diagnostic techniques are expected to replace conventional approaches, resulting in modest growth in microbiology.

Target Audience

- Researchers in Life Science
- Microbiologists
- Specialist in infectious diseases and tropical medicines
- Medical Colleges and Hospital
- Food and Beverages Industries
- Pharmaceutical and Clinical Microbiologist
- Public Health Microbiologist
- Foensic Microbiologist
- Students and Professionals
- Research Institutes
- Bio Technologist
- Quality Control Clinicians
- Marine Microbiologist
- Farm Technicians
- Under Graduates
- Post Graduates
- Doctor of Philosophy

Who should attend?

- Microbiology Students, Scientists and Professors
- Microbiology Researchers
- Laboratory Technicians
- Healthcare Faculty
- Medical Colleges
- Healthcare Associations and Societies
- Microbiology Associations and Societies
- Business Entrepreneurs
