MARKET ANALYSIS

In both Gynecologic and Obstetrics conditions ultrasound is performed generally. In developing countries one of the threatening cause for maternal death is being indiscreet of pregnancy complications this leads to death and disability between the women of reproductive age. Maternal deaths must be reviewed to make motherhood safer. The status of maternal deaths in the United States was part of a larger report on the global, regional, and national levels and causes of maternal mortality from 1990-2013. Women's health issues have attained higher international perceptibility in the recent decades. The transformation of women lives has changed over the decades this is because the lifespan of a women is gradually decreasing from 1970's- 1990's with a age of 85 to 50 years respectively.
