ABOUT US

Since many years Pulsus has also been very instrumental to provide an invaluable channel for scientists and researchers to exchange ideas and research by creating a forum for discussing the possibilities of future collaborations between universities, institutions, research bodies and organizations from different countries through international conferences and meetings.

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

With a legacy of 30 years of excellence in Medical Publishing we are endorsed by various societies like International Academy of Cardiovascular Sciences, International Society of Addiction Medicine, European Biotechnology Thematic Network Association, World Federation of Paediatrics Intensive and Critical Care Societies, World Association of Medical Sciences, International Society for Ceramics in Medicine, Thalassaemia International Federation and World Association of Integrated Medicine to nurture the research and development for the beneficence of society.

MARKET ANALYSIS

The pediatric surgery market exceeded USD 2.4 billion in 2019 and is predicted to register over 7% CAGR from 2020 to 2026. The growing market size is associated with an increase in the number of neonatal healthcare facilities around the world, along with a rise in the number of premature babies in both developed and developing economies. As per a recent statistic published in a Hunt article, around 11% of whole pregnancies end in premature or early deliveries. In the U.S., around 450,000 babies are born prematurely, and globally, 15 million new births are premature. Hence, newborn babies must be admitted to pediatric surgical care facilities that provide advanced treatment and specialized nursing care. The pediatric surgery market is expected to experience significant growth over the forecast period. The increasing prevalence of childhood diseases and disorders requiring surgical intervention, along with advancements in surgical techniques and technology, are the primary drivers of this growth..

ABOUT VENUE

Paris is the capital and most populous city of France. Paris is located in north-central France, in a northern bending arc of the Seine whose crest includes two islands, Île Saint-Louis and the larger Île de la Cité, which form the oldest part from the city. Paris has a typical Western European oceanic climate which is affected by the North Atlantic Current. The general climate throughout the year is mild and moderately humid. Paris has been one of the main European centers of finance, diplomacy, commerce, fashion, science and the arts. Central Paris contains the city's most visited monuments, including Notre-Dame Cathedral and the Louvre as well as Sainte-Chapelle. Les Invalides, where Napoleon's tomb is located, and the Eiffel Tower are located on the left bank to the southwest of the center. For centuries, Paris has attracted artists from around the world, who come to the city to train and seek inspiration from its vast pool of artistic resources and galleries. As a result, Paris acquired a reputation as a "City of Art". Italian artists had a profound influence on the development of art in Paris in the 16th and 17th centuries, particularly in sculpture and reliefs. Painting and sculpture became the pride of the French monarchy, and the French royal family commissioned many Parisian artists to adorn their palaces during the era of French Baroque and Classicism.
