PULSUS brings in a new spin on conferences by presenting the latest scientific improvements in your field. Listen to motivating keynotes from thought leaders or rub elbows with pioneers across the globe. Vienna is all set for an amazing event as PULSUS proudly presents the "**13th International conference on Dementia and Alzheimer Diseases** "slated on **November 15, 2021**, as a **Webinar**. The theme of the conference is Delving into the Advancements of Dementia and Alzheimer's care.

Dementia focusses on the diagnosis and treatment of diseases affecting the nervous system. The nervous system includes brain and Spinal cord. Neurodegenerative Disorders occurs when the neurons in the human brain are affected. Neurodegeneration is the process of loss of structure or function of neurons; it may also include death of neurons. Neurodegeneration leads to many diseases like Myotropic lateral sclerosis, Huntington's , Parkinson's, and Alzheimer's. The most common type are Parkinson's disease and Alzheimer's disease.

Market Analysis

The world Alzheimer's therapeutics market was estimated at USD 4.0 billion in 2015 due to the increasing prevalence and predominance rates of this disease and growing geriatric population base. In 2015, it had been projected that 47 million people were being with Alzheimer's Disease (AD) across the world. It mostly occurs within the older people that are 65 years and above. Furthermore, increasing awareness level regarding its symptoms, like partial dementia, is projected to spice up the demand.

The development of latest and advanced technologies is expected to contribute to the development of the general market. as an example, the event of latest cloud-based cognitive assessment systems is predicted to propel the growth. These systems help in identification of effects of medicine in patients. Hence, with the support of this technique, pharmaceutical companies can evaluate the ability and wellbeing of pipeline drugs for the treatment of this disease.

The increasing government funding for the Alzheimer's care, regime, and research interests is valued to fuel the extension of this industry. Various organizations involved during this activity include the National Institute of Health (NIH), Alzheimer's Association, and therefore the Florida Department of Health.

Recently, an alternative proposal referred to as Alzheimer's Combination Therapy Opportunities was introduced together of Alzheimer's Drug Discovery Foundation, Alzheimer's Association, and Alzheimer's Society UK. This proposal is anticipated to supply this market with growth opportunities. This proposal includes a mixture of repositioned or repurposed drugs that have the potential to hamper the progression of AD.
