Invitation

In continuation with the past “Dementia Conference 2019” Pulsus group proudly invites all the participants and sponsors across the globe to participate in the “12th International conference on Dementia and Alzheimer Diseases” (Alzheimers2021) which will be held during June 28-29, 2021 at Paris,
France. The main focus of our conference is to bring the renowned neurologist, neurosurgeons, researchers, health care professionals and special educators under a single place to share their knowledge and scientific progress in the field of dementia and Alzheimer diseases in the theme “**Confront and Allay Dementia through miscellaneous Pedagogy during COVID19**”
Our conference includes a well-balanced line up of speakers, covering both broad specific topics of interest. Our aim is to provide the neurosurgeon, specialists and anyone professionally involved in dementia diseases with an opportunity to learn about the complex nature of the diseases, understand the local realities and discover better remedy for the dementia conferences, we hope that you will grab the opportunity and associate with us.
Dementia is the word used to describe many different diseases and their effects on brain death. Alzheimer is the most common form of dementia. It is the life limiting condition that gets worse over time. Dementia areas that may become difficult include memory, sense of time and space, language and communication.
We hope to meet at France!..

Regards
Physiotherapy 2021
Organizing Committee

Conference Highlights

- Dementia and Alzheimer diseases
- Symptoms and causes of dementia.
- Prevention measures
- Neurology
- Neurosurgery
- Neuropharmacology
- Neurological disorders
- Neurodegenerative diseases
- Types of dementia
- Vascular dementia
- Amyloid protein in dementia
- Dementia nursing
- Dementia rehabilitation and therapy
- Drug development in dementia
- Imaging techniques for brain
- Care practice and awareness
- Clinical trials and case report
- Animal model and translational
- medicines
- Current research in therapeutic targets

Agenda

Day-01- September 03, 2021 - Friday

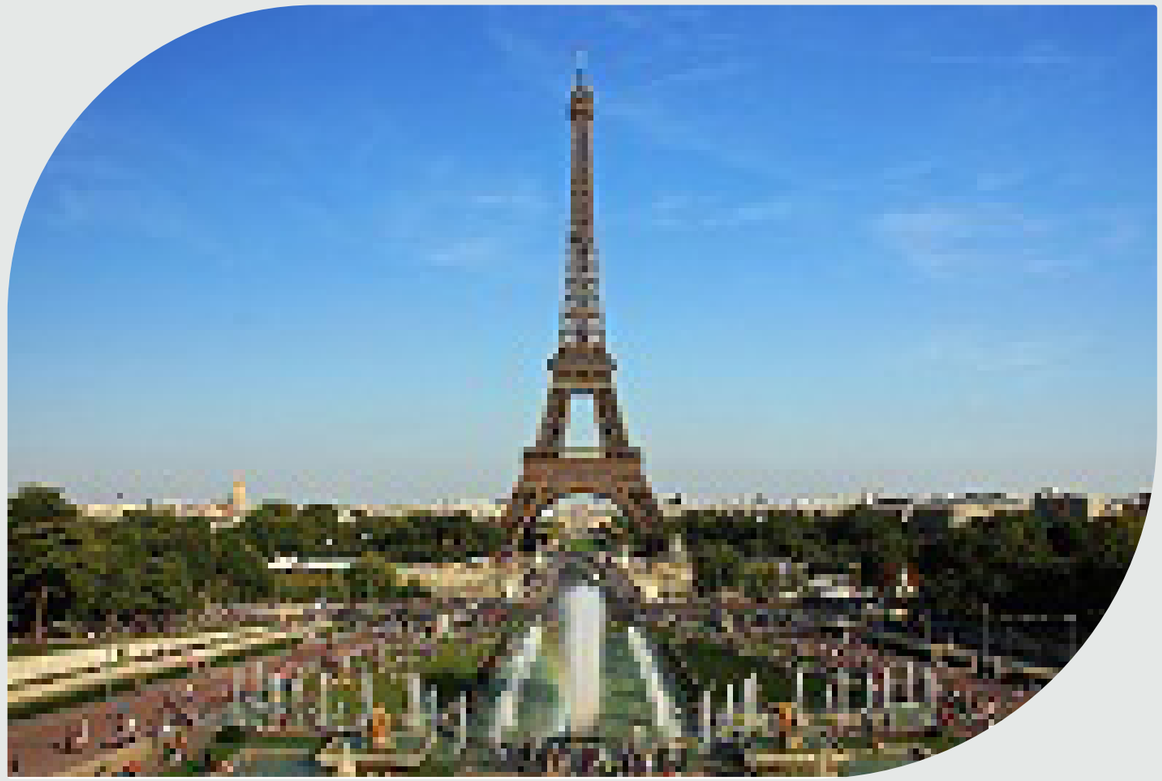

Time	Session
08:30-09:30	Registrations
09:30-11:30	Keynote Forum
Group Photo	
11:30-11:45	Network & Refreshments Break*
11:45-13:00	Tracks: Dementia | Neurology | Neurosurgery | Neuropharmacology
13:00-13:45	Lunch Break**
13:45-16:00	Tracks: Neurological Disorders | Neurodegenerative Diseases | Types o Dementia| Vascular Dementia
16:00-16:15	Network & Refreshments Break*
16:15-18:00	Tracks: Amyloid Protein in Dementia | Dementia Nursing | Imaging Techniques For Brain

Tentative

Day-01- September 04, 2021 - Saturday

Time	Session
08:30-09:30	Registrations
09:30-10:30	Keynote Forum
10:30-11:30	Tracks: Drug Development in Dementia | Animal Model and Translational Medicines
11:30-11:45	Network & Refreshments Break*
11:45-13:00	Tracks: Dementia Rehabilitation and Therapy | Symptoms of Dementia | Causes of Dementia
13:00-13:45	Lunch Break**
13:45-16:00	Tracks: Prevention Measures | Clinical Trials and case report | Current Research in Therapeutic Targets
16:00-16:15	Network & Refreshments Break*
16:15-18:00	Poster Presentations
Day Concludes	
Award Ceremony	

Tourist Attractions

Venue

PARIS is the political, social, and scholarly capital of France and the “City of Lights” is the single most visited city on the planet. It has drawn floods of foreigners, exile craftsmen and learned people, and worldwide dealers for quite a long time, rich political and aesthetic history, attracting by virtue of its vibrant economy, abnormal number of noteworthy tourist destinations, remarkable cultural architectural life and high standard of living.

Paris has dependably been known to have the aura of romance and mystery and has been the setting for some books and motion pictures. One of the most well-known landmarks in the world called Eiffel tower is in Paris, which is reaching a height of 324 meters, built of iron and more than 7,000 tonnes in weight.

Paris is a noteworthy rail, highway, and air transport centre. The syndicate organizes open transport and contracts it out to the RATP (working 347 transport lines, the Métro, eight tramway lines, and areas of the RER), the SNCF (operating rural rails, one tramway line and alternate segments of the RER) and the Optile consortium of private administrators overseeing 1,176 transport lines.

Paris has a run of the Western European oceanic climate which is influenced by the North Atlantic Current. The general atmosphere during the time is mild and tolerably wet. Summer days are typically warm and wonderful with normal temperatures and a considerable amount of sunshine.

Spring and Autumn have shockingly warm or cool climate happens frequently in the two seasons.

In winter, daylight is rare; days are cool, nights cold yet for the most part above freezing with low temperatures. To reach the top level, at the dizzying elevation of 276 meters, requires an exhilarating elevator ride from the second level. Visiting the top level is one of the most thrilling things to do in Paris, but it is not for the faint of heart. And, the famous museum was also available in the Paris city, this museum contains famous painting called “Mona Lisa” painted by Leonardo da Vinci in 1503- 1505.

The first thing you should do if you are ever in Paris is buy one of these from an authentic patisserie or boulangerie. One dish that gained popularity in southern France is Cassoulet. This dish is French comfort food at its best. If you ever find yourself in Burgundy mid-morning, then stop off for brunch and try this French version of poached eggs.

“Paris is not a city; it’s a world.”
