About PULSUS

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, Pulsus Group closely associates with the Canadian and other international medical research associations like Canadian Society of Plastic Surgeons, Canadian Society for Aesthetic Plastic Surgery, Groupe pour l'Avancementde la Microchirurgie Canada, Canadian Society for Surgery of the Hand. It publishes a wide range of medical journals that focus on medical specialties like cardiology, Integrative Medicine, Surgery and Reproductive Medicine.

Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

30 YEARS OF EXCELLENCE IN MEDICAL PUBLISHING

Anatomy is the branch of biology which deals with the investigation of structural organization of organisms. It is intrinsically embedded with evolutionary biology, phylogeny and embryology. Physiology is the systematic study of the functions of the organisms and their body parts which includes cell physiology, system physiology and defense physiology. Anatomy and Physiology make up a natural correlated discipline pair hence they are always studied together. Anatomy and Physiology are the vital requisite for medical training. Lack of basic knowledge in anatomy and physiology would make health professionals cannot accurately evaluate, diagnose and treat illnesses. The innovation in technology is paving the way for producing artificial functioning organs instead of going for organ transplants with the help of deeper knowledge in anatomy and physiology of humans.
