MARKET ANALYSIS

The global market for nephrology and urology devices was worth USD 4.34 billion in 2020, and it is expected to grow at a CAGR of 6.6 percent between 2021 and 2028.The key drivers of market expansion are the growing senior population as well as the increasing incidence and prevalence of chronic kidney disease (CKD). According to the National Kidney Foundation's estimations, CKD affects 10.0 percent of the global population. As a result, as the target population expands, so does overall product demand. Diabetes and high blood pressure (hypertension) are two of the leading causes of kidney failure, and the rising global prevalence of these disorders is fueling market expansion.

Diabetes is responsible for 38.4 percent of kidney failures, while high blood pressure is responsible for 25%, according to the American Kidney Fund.

ABOUT VENUE

"France Healthcare Outlook Report, 2020," report provides comprehensive insights about healthcare scenario, regulatory policies and reimbursement landscape in France. The report also identifies key trends in the healthcare market and provides insights into the demographic and healthcare infrastructure of the country. Along with this the report also provides a brief look into the trends and segmentation of the pharmaceutical and medical devices market of France.

France has 2,694 healthcare establishments, including 35% public, 39% private and 26% private non-profit, 655 hospital facilities for emergency treatment, 494 of which are public 331 telemedicine projects (renal or heart failure, chronic wounds, diabetes, etc.).

France is a leader in the field. Advances in healthcare are driven by original, innovative, high-quality biomedical research and its rapid application to diagnostics, treatment, healthcare and public health.
