Aquaculture Fisheries 2020 focuses on multiple aquaculture areas. As a viable method producing seafood, aquaculture or fish farming has gained momentum as demand for fresh fish has put a strain on natural populations. Fisheries & Aquaculture is one of the world's fastest growing food industry. Most specifically, having a safe source of seafood is a fundamental element of the global solution. Using aquaculture to help meet fish demand increases the population and development of natural resources, reducing the burden on stressed fishing.

This Conference aims to bring together a distinctive and world-class combination of scholars, scientists, experts and practitioners from both the academic community and industry to share their experiences, and advances in aquaculture science and its related field of fisheries.
