Fisheries and aquaculture is an essential resources for food, nutrition, income and employment for billions of people all over the globe. Studies State that fish accounted for about 17% of the world population's intake of animal protein and 6.7% of all protein intake. In addition, fish provided more than 3.1 billion humans with almost 20% of their average per capita intake of animal protein. It is an important source of essential fats (e.g. long-chain omega-3 fatty acids), vitamins (D, A and B) and minerals (including calcium, iodine, zinc, iron and selenium), particularly if eaten whole. World aquaculture production of fish accounted for 44.1% of whole production (including for non-food uses) from capture fisheries and aquaculture in 2014. Coastal habitats (e.g. mangroves and marshes), geographic information systems (GIS) and remote sensing are more and more facilitating the differentiation and process of vegetation types – important for establishing baselines and monitoring change.

About City and Venue

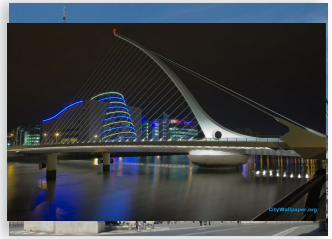

Dublin, capital of the Republic of Ireland, is in the province of Lienster at the mouth of River Liffey bordered by Wicklow Mountains. It is also the capital of The Craic, the art of life. The city is steeped in rich history, starting with the Vikings laying its first streets. Through the centuries, The Craic and an unruly artistic streak have helped shape Dublin into what it is now: A vibrant capital that moves at an easy going pace. Its historic buildings include Dublin Castle, dating to the 13th century, and imposing St Patrick's Cathedral, founded in 1191. City parks include landscaped St Stephen's Green and huge Phoenix Park, containing Dublin Zoo. The National Museum of Ireland explores Irish heritage and culture. Dublin's elegant Georgian architecture makes it one of Europe's most attractive capitals.
