About PULSUS

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, Pulsus Group closely associates with the Canadian and other international medical research associations like Canadian Society of Plastic Surgeons, Canadian Society for Aesthetic Plastic Surgery, Groupe pour l'Avancementde la Microchirurgie Canada, Canadian Society for Surgery of the Hand. It publishes a wide range of medical journals that focus on medical specialties like cardiology, Integrative Medicine, Surgery and Reproductive Medicine.

Pulsus Conferences explore the future by connecting minds and spreading brilliance at Pulsus Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. Pulsus group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives. Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

Bacteriology is the study of bacteria and interrelated subjects which includes application in health care, microbiology,biotechnology,cell biology and other various fields. The recent revolution is the identification of bacteria by the phenotypic characteristic through Matrix -assisted laser desorption ionization time-of-flight (MALDI-TOF) mass spectroscopy. The virulence of the bacteria have increased by the climatic condition and seasonal changes. No humans can be germ free and so the presence of bacteria is enormous causing infectious diseases on humans. Infectious diseases are the third leading cause of death in USA and major leading cause of death in other parts of the world. Vaccines are used in the preventive measures of infectious diseases. Bacteriophages act as bioagents for the treatment of infectious diseases. Antibodies and antigens play an important role in the vaccine production and thus the improvement in the attenuated bacterial vaccines to reduce infection in human is encouraging.

San Antonio is one of the popular tourist place in USA. The Alamo Mission in San Antonio which is located in downtown, is the top tourist attraction and hence it is often called Alamo City. It is also called the River city because the River Walk which meanders through the Downtown area, is the second most attraction of the city. The Downtown Area also features San Fernando Cathedral, The Majestic Theatre, Hemisfair, La Villita, Market Square, the Spanish Palace of the governor, and the historic Menger Hotel. The Fairmount Hotel, built in 1906 and San Antonio's second oldest hotel, is in the Guinness World Records as one of the heaviest buildings ever moved intact. The city has one of the largest marine life park in the world called Sea world. It has amusement parks which include Six Flags Fiesta Texas, Splashtown and Morgan Wonderland, a theme park for children with special needs. Kiddie Park, featuring old-fashioned amusement rides for children. To make it a better place to visit it has many museum, Historical Park, Botanical Garden and also theatres.
