PULSUS brings in a new spin on conferences by presenting the latest scientific improvements in your field. Listen to motivating keynotes from thought leaders, or rub elbows with pioneers across the globe. Chicago, USA is all set for an amazing event as **PULSUS** proudly presents the “World Conference on Bacteriology and Infectious Diseases” slated on August 13-14, 2018 at Chicago, USA.

PULSUS cordially welcome researchers, academicians, students and business professionals in the field of Bacteriology from around the world to participate in the upcoming Bacteriology 2018. The meeting for this year will revolve around the theme “Exploring Innovative & Integrative frontiers in Bacteriology and Infectious Diseases” thus relaying the most cutting edge findings in the field of Bacteriology and Infectious Diseases research. The two day meeting is going to be an event to look forward to for its enlightening symposiums & workshops from established experts of the field, exceptional keynote sessions directed by the best in the business. It will also prove to be a brilliant open door for the representatives from Universities and Institutes to cooperate with the world class researchers and an outstanding opportunity for businesses keen at expanding their global market reach. Interested individuals can confirm their participation by registering for the conference along with their colleagues. Register soon and avail exciting early bird discounts.

Invitation

Pulsus Group is an internationally renowned medical peer-review publisher and conferences organizer established in the year 1984 publishes and hosts the work of researchers in a manner that exemplifies the highest standards in research integrity.

PULSUS conferences act as a catalyst on the research trends that really matter and spurring their adoption by exploring and disseminating cutting-edge information. Thus, mainly adhere to stringent peer-review procedure with a view to set an example in promoting standard medical research with integrity. As an ardent supporter of medical publishing, **Pulsus** Group closely associates with the Canadian and other international medical research associations like Canadian Society of Plastic Surgeons, Canadian Society for Aesthetic Plastic Surgery, Groupe pour l'Avancement de la Microchirurgie Canada, Canadian Society for Surgery of the Hand. It publishes a wide range of medical journals that focus on medical specialties like cardiology, Integrative Medicine, Surgery and Reproductive Medicine.

Pulsus Conferences explore the future by connecting minds and spreading brilliance at **Pulsus** Group annual conferences & meetings. Meet your colleagues, discuss your specialty, spread and aid, learn & grow in association with 1000+ scientific societies from The USA, Europe, The Middle East, Africa and The Asia-Pacific region. **Pulsus** group is closely associated with globally renowned academic and research societies.

Pulsus Conferences believe that true technology and innovation depends on hearing from, and listening to, people with a variety of perspectives.

Pulsus Conferences enhances the technology for people from underrepresented groups by actively recruiting diverse speakers for our events, signing up a broad variety of authors for journals and videos, and taking part in ongoing conversations about the value of diversity in the communities we serve.

About PULSUS

Bacteriology is the study of bacteria and interrelated subjects which includes application in health care, microbiology, biotechnology, cell biology and other various fields. The recent revolution is the identification of bacteria by the phenotypic characteristic through Matrix-assisted laser desorption ionization time-of-flight (MALDI-TOF) mass spectroscopy. The virulence of the bacteria have increased by the climatic condition and seasonal changes. No humans can be germ free and so the presence of bacteria is enormous causing infectious diseases on humans. Infectious diseases are the third leading cause of death in USA and major leading cause of death in other parts of the world. Vaccines are used in the preventive measures of infectious diseases. Bacteriophages act as bioagents for the treatment of infectious diseases. Antibodies and antigens play an important role in the vaccine production and thus the improvement in the attenuated bacterial vaccines to reduce infection in human is encouraging.

Target Audience

- Bacteriologist
- Healthcare Analysts
- Biotechnologist
